Additional comments:

Yes

Question 2:Do you agree with the proposed approach for Business Radio assignments?:

Yes

Question 3:Do you agree with the proposal to allocate spectrum for Maritime and/or Land Search and Rescue use?:

Yes

Question 4:Do you agree with the proposal to make some spectrum not currently assigned to other applications available on a temporary for Amateur Radio use with these restrictions?:

Yes, I hope this will be the first of many.
Modern Software Define Radios mean that it is much easier to operate on these temporary vacant bands.
It also means we can experiment on virgin spectrum without causing interference to establish repeater/satellite networks.
