

Please ensure the the Murdoch organisation fail in its attempt to force us to pay them to watch any HDTV. Please ensure that the BBC HD trial service continues as a full service and that other Broadcasters join in. Do not listen to the arguments of the mobile operators who are eager to grab spectrum to download VERY expensive videos to our children. Please remember what a fiasco the relest of the Band I/III TV channel following the switch to UHF was.

Please save some spectrum for thise who will be unable to receive either Digistal Terrestrial TV of Sattleit TV as planned.]
