

As pensioners my wife and I get a lot of pleasure from free to air tv and we have been particularly impressed with the BBCs` trial broadcasts of HD on the satellite platform. We have no intention of paying a subscription for tv reception so if no spectrum is allocated for the 5 main DTTV channels to be in HD we shall be excluded from this technology on grounds of cost. We therefore hope that consideration should be given to the providers of the 5 main DTTV channels for free HD reception.
