

Question 1: This executive summary sets out Ofcom's proposals for the release of the digital dividend. Do you agree with these proposals?..:

No. Since the proposals do not reserve spectrum for HD DTT broadcasting, it tips the balance of future broadcasting towards satellite and cable broadcasters. Since, in the UK, the only current 'universal service' that can support a useful number of channels is the subscription based services exclusively provided by Sky, this would provide unfair commercial advantage to a 'monopoly' HD broadcaster. This is not in the public or consumers interests.

I therefore object to OFFCOM's proposal not to reserve spectrum for future HD DTT public broadcasting applications.

Question 2: Do you have any comments on our analysis of the essential constraints that will apply to the available UHF spectrum?..:

No comment

Question 3: Do you agree with the more detailed analysis and proposals regarding these technical constraints as set out in Annex 10?..:

No Comment

Question 4: Do you have any comments on Ofcom's assessment of the potential uses of this spectrum? Are there any potential uses which should be considered that are not mentioned in this document?..:

No Comment

Question 5: Do you have any comments on our analysis of the choice between a market-led and an interventionist approach to the release of this spectrum? Do you agree with the analysis of different mechanisms for intervening to remedy potential market failures?..:

No comment

Question 6: Do you agree with our proposals to continue making available channel 69 for use by low power PMSE devices? Do you agree with our proposal to make some or all of the spectrum available for use on a licence-exempt basis?..:

No comment

Question 7: Do you agree that there should be transitional protection for professional PMSE users to ensure that they can continue to access

interleaved capacity until at least the end of 2012? Do you have any views on the mechanism for providing future access to this spectrum?..:

No comment

Question 8:Do you consider that additional spectrum from the digital dividend should be reserved for low power applications? If so, please provide as much evidence as possible about the nature of the application and its potential value to society.:

No comment

Question 9:Do you consider that it would be desirable to hold back some spectrum from award with a view to its potential use for future innovation? If so, please provide comments on how much spectrum should be held back, and for how long.:

No comment

Question 10:Do you agree with our proposal that we should package the interleaved spectrum in a way that would be suitable for use by local television services, but not reserve spectrum solely for this use?..:

No comment

Question 11:Do you agree with our proposal to package the spectrum in a way which does not preclude mobile broadband use, but to take no further action in relation to this use?..:

No comment

Question 12:Do you agree with our proposal that we should not intervene in the award of this spectrum to reserve spectrum for DTT? Do you agree that we should package the spectrum in a way which is suitable for DTT use?..:

No. See comments above, psecifically:

"No. Since the proposals do not reserve spectrum for HD DTT broadcasting, it tips the balance of future broadcasting towards satelite and cable broadcasters. Since, in the UK, the only current 'universal service' that can support a useful number of channels is the subscription based services exclusivly provided by Sky, this would provide unfair commercial advantage to a 'monopoly' HD broadcaster. This is not in the public or consumers interests.

I therefore object to OFFCOM's proposal not to reserve spectrum for future HD DTT public broadcasting applications."
