

Re: Spectrum Framework Review issued 23 November 2004 Section I to Annex J

As a private individual, I do not think this framework review will work. There has been no mention of PLT which would be devastating to the whole country as a whole I do not think there should be any alteration of the present laws. It would allow too many people free licence which you could not control. You would end up like all the mistakes which have been made in the United States and Italy, which I have first hand knowledge of. Once it is done you cannot back out. I am 81 years of age. It is too late for me but not for my younger family. As far as RF is concerned, it is very deadly in the wrong hands. Please think twice before you do. May be something like this should go to a national newspaper.
