

Comments on Spectrum Framework Review and its relationship to Amateur Radio.

As I consider that officials consider all spectrum as sellable as income generating they seem to have missed a very important point that the Amateur Radio Bands specifically prohibit Commercial, Political, Military, Broadcasting and Religion etc, It is officials that need to be controlled. With officials having failed to abide by the close down of Amateur Radio Bands for the duration of the Second World War plus one year, despite the fact that the close down was probably not legal in the first place. Having got away with that they seem to think that they can get away with using Amateur Bands for other purposes as they want and maintain a permanent presence on a band i.e. Ship to Shore call Systems etc. Broadcasting transmissions. With the below producing broad spectrum of noise and close power peaks of Radio Frequency energy making it sometimes impossible to use the Bands for Amateur Radio purposes.

Microwave ovens.

Low Power devices.

Broadband Power Line Transmissions.

Spread Spectrum

Navigation Systems. Radar Systems

Fast Data systems like WLAN, Blue Tooth, and WiFi etc.

The following KISS should be mandatory for all in any part of any Amateur Band, regardless of whether the national Government wishes to allow exclusive Amateur Radio use of that part of the Spectrum including UK & Europe, so as to control the runaway use by Officials of Amateur Radio Spectrum for no Amateur use. As the Amateur Spectrum is not the Governments and is not for sale, it is the Officials that are not abiding by the spirit and the letter of Amateur Radio for a long time.

- a. No detectable signals from any Non Amateur transmissions allowed in any part of any Amateur Band.
- b. Recall and destruction of all Non Amateur Radio Transmitters capable of transmitting in any part of any Amateur Band.
- c. Treating of Piracy of any part of any Amateur Band with the same level of punishment as Piracy on the high seas.
- d. With persistent offender the seizure of all their assets and the distributing to all Radio Amateurs, including in the list of those whose actions might result in seizure are, Ministers, Judges, Magistrates, Officers, Officials, Civil Servants, Companies, Directors, Share Holders and Employees.
- e. We also hope you will get away from the situation of those in control of Amateur Radio battling for the other team, with a restriction on who can be allowed to control the Amateur Bands to those with no connection or interest in non Amateur use of the Spectrum.
- f. We hope that you will help recover the whole of all Amateur Bands and clean out non-Amateur transmission, and stop the Ministers and Civil Servants in their “we will sell it to commercial users if they bid enough for it” Policy.

Many thanks to the late “Secret Listener” who educated me as to what has gone on in the past and asked me to fight to save “Amateur Radio Bands” from the less honest people around the “Radio Spectrum”. I hope that this will provide a reply to all the questions asked in the spectrum review and provide a pointer to a new course to steer the control of the “Amateur Spectrum” to.
