## Section 2

## Foreword

2.1	The Radio Equipment and Telecommunications Terminal Equipment Directive 99/5/EC (R&TTE Directive) was implemented in the United Kingdom (UK) on the 8 April 2000 by The Radio Equipment and Telecommunications Terminal Equipment Regulations 2000, Statutory Instrument 2000 No. 730. In accordance with Articles 4.1 and 7.2 of Directive 1999/5/EC, this UK Interface Requirement contains the requirements for the licensing and use of <i>Spectrum Access</i> in the specified frequency bands.
2.2	Nothing in this UK Radio Interface Requirement shall preclude the need for equipment to comply with Directive 1999/5/EC.
2.3	It is required by the Wireless Telegraphy Act 2006 that no radio equipment is installed or used in the UK except under the authority of a licence granted by or otherwise exempted by regulations made by Ofcom. It is a condition of such a licence or exemption regulations as appropriate that, in order to be installed or used in the UK, the equipment must meet the minimum requirements specified in this UK Interface Requirement for the stated equipment types and for the stated frequency bands. Nothing in this UK Interface Requirement shall preclude equipment from being placed on the market in the UK that complies with the 'essential requirements' specified in Directive 1999/5/EC.
2.4	The requirements given in the main body of this UK Radio Interface Requirement will apply to the licensing of <i>Spectrum Access in the band 40.500 to 43.500 GHz</i> .
2.5	<p>This UK Radio Interface Requirement will be revised as necessary, for example to take into account:</p> <ul style="list-style-type: none"> <li data-bbox="316 1267 1331 1368">i) current technology developments for reasons related to the effective and appropriate use of the spectrum in particular maximising spectrum utilisation;</li> <li data-bbox="316 1413 1331 1559">ii) changes to the available spectrum allocated for <i>Spectrum Access 40.500 to 43.500 GHz</i>;</li> </ul> <p style="text-align: center;">and</p> <ul style="list-style-type: none"> <li data-bbox="316 1603 1214 1637">iii) the adoption of appropriate European Harmonised Standards.</li> </ul>
2.6	All UK Radio Interface Requirements notified under Directive 1998/34/EC will be published and will be made available free of charge from the Ofcom web-site at <a href="http://www.ofcom.org.uk/radiocomms/ifi/tech/interface_req/">http://www.ofcom.org.uk/radiocomms/ifi/tech/interface_req/</a>
2.7	Further information on this UK Radio Interface Requirement can be obtained from the technical enquiry contact given at the back of this document.

### Section 3

## Minimum requirements for operation within the UK

3.1	The minimum requirements in this document are made for reasons related to the effective and appropriate use of the radio spectrum, in particular maximising spectrum utilisation.
3.2	This UK Radio Interface Requirement gives a high level description of how the spectrum in the UK [1] is used for <i>Spectrum Access in the band 40.500 to 43.500 GHz</i> It does not prescribe technical interpretation of the 'essential requirements' of Directive 1999/5/EC.
3.3	This UK Radio Interface Requirement therefore stipulates the necessary equipment parameters for the licensing of <i>Spectrum Access in the band 40.500 to 43.500 GHz</i> in the UK [1]. Table 3.1 contains the relevant usage parameters. These taken together with the 'essential requirements' detailed in Article 3.2 of Directive 1999/5/EC constitute the minimum requirements for <i>Spectrum Access in the band 40.500 to 43.500 GHz</i> within the UK. Nothing in this UK Interface Requirement shall preclude equipment from being placed on the market in the UK that complies with the 'essential requirements' specified in Directive 1999/5/EC.
3.4	The technical parameters specified in the UK Radio Interface Requirement are applied to achieve the desired level of compatibility within the <i>Spectrum Access in the band 40.500 to 43.500 GHz</i> and with other radiocommunications services, whilst promoting enterprise, innovation and competition.
3.5	This UK Radio Interface requirement provides the necessary technical information which facilitates access to the 40.500 to 43.500 GHz spectrum, by making clear the assumptions that are made in planning the use of the <i>Spectrum Access in the band 40.500 to 43.500 GHz</i> , in the UK. It is not the intention of this UK Radio Interface Requirement to duplicate or impose any additional 'essential requirements' of the Directive 1999/5/EC on products. Any specified parameters within this document are for the purpose of identifying product options and not as a national de facto product requirement

**Section 3**

Table 3.1 Minimum requirements for the use of: <i>Spectrum Access operating in the 40.500 to 43.500 GHz, band</i>												
<b>Mandatory (1-9)</b>												
1	Frequency band (GHz)	40.500 to 43.500 <sup>1</sup>  <sup>1</sup> The necessary bandwidth of any transmission (as defined in ITU-R Recommendation ITU-R SM.328) must fall entirely within the limits above.										
2	Radio service	TERRESTRIAL RADIOCOMMUNICATION AND SATELLITE SERVICE										
3	Application	Spectrum Access										
4	Channelling modulation	Not specified										
5(a)	Transmit power limit ( <i>terrestrial radiocommunication</i> )	<table border="1"> <thead> <tr> <th>Frequency Offset from edge of block</th> <th>Maximum EIRP level</th> </tr> </thead> <tbody> <tr> <td>in block other than that defined below</td> <td>55 dBW (any bandwidth)</td> </tr> <tr> <td>-14 MHz of block edge</td> <td>30 dBW/MHz</td> </tr> <tr> <td>Block edge when arrived at from in-block</td> <td>11 dBW/MHz</td> </tr> <tr> <td colspan="2">Where; - = in-block of block edge linear interpolation between points</td> </tr> </tbody> </table>	Frequency Offset from edge of block	Maximum EIRP level	in block other than that defined below	55 dBW (any bandwidth)	-14 MHz of block edge	30 dBW/MHz	Block edge when arrived at from in-block	11 dBW/MHz	Where; - = in-block of block edge linear interpolation between points	
Frequency Offset from edge of block	Maximum EIRP level											
in block other than that defined below	55 dBW (any bandwidth)											
-14 MHz of block edge	30 dBW/MHz											
Block edge when arrived at from in-block	11 dBW/MHz											
Where; - = in-block of block edge linear interpolation between points												

**Section 3 (cont...)**

5(b)	Transmit power limit <i>(satellite service in the band 42.500 to 43.500 GHz)</i>	No limit upon the maximum permitted EIRP level (on main beam of antenna, i.e. within the -3dB antenna beamwidth)
6	Channel occupation rules	Not specified
7	Duplex type separation	Not specified
8	Licensing regime	Spectrum block on a geographical basis. WT Act licence required Tradable licence. The area in which use is permitted is contained within the authorisation/licence document applicable to the band.
9	Additional essential requirements (art. 3.3)	N/A

<b>Informative (10-14)</b>		
10	Frequency planning assumptions	Co-ordination and site clearance considerations may impose additional restrictions on the maximum e.i.r.p allowed on specific frequencies, directions and locations.
11	Reference	N/A
12	Remarks	
13	Notification number	98/34/EC Notification Number: 2007/410/UK
14	Additional	N/A.

**Section 4**

# Additional performance parameters (informative)

**None:**
