

ACCESS CODE APPLICATION

This form should be used to apply for **'Type B'** Access Codes only.

Type B Access Codes are commonly used for:

- i) **Directory Enquiry ("DQ") services** (6-digit codes of the format 118XXX) – codes used by callers to access services available from their own provider of Public Electronic Communication Networks or from that of another; and
- ii) **Indirect Access ("IDA")** (5-digit codes of the format 1XXXX) - codes used by the end users of one provider of a Public Electronic Communication Network to have selected calls connected by another.

NB. If you are applying for Access Codes for DQ services (ie. 118XXX codes) on behalf of a sub-allocatee(s), you MUST enclose a signed, letter-headed serious 'statement of intent' from each sub-allocatee you are representing.

OfTel has also set aside two specific ranges of Access Codes – Type A and Type C:

Type A – to allow directly connected customers access to services recognised as having such widely understood significance that they may be used throughout the UK by all providers of Public Electronic Communication Networks offering equivalent services (whether directly or through the agency of another), and will not be used by anyone for any other service e.g. 100 – operator assistance, 123 – speaking clock, etc. and

Type C – for independent use by providers of Public Electronic Communication Networks to allow directly connected customers and employees access to services, other than services covered by Type A and Type B access codes.

Providers of Public Electronic Communication Networks should inform OfTel in writing as and when they use Type A and Type C Access Codes, and provide details of the service.

Form S10 - Annex A

A1. Confirmation of Status:

Oftel generally only allocates Telephone Numbers to providers of Public Electronic Communications Networks.

Oftel may also allocate numbers, in circumstances where the provider has been unable to obtain a sub-allocation from a provider of a Public Electronic Communications Network and where number resource implications do not preclude allocation, to providers of Public Electronic Communications Services. Oftel would also normally expect to see that the provider has arrangements in place for its service to be carried over a network.

In order to determine whether or not you are a provider of a Public Electronic Communications Network, Oftel needs certain information from you. Please provide details of:

- a) the Electronic Communications Network on which the Telephone Numbers applied for are intended to be Adopted;

(a diagram may be useful to assist Oftel in assessing your eligibility for Telephone Numbers).

- b) the Electronic Communications Service which you are intending to provide over that network;

Please note that it is not Oftel's intention for a Communications Provider to be assessed more than once to determine whether or not it is a provider of a Public Electronic Communications Network. Therefore if you have answered yes to Question A4(a) below, you do not need to answer questions A1(a) and (b) above,

or
