Oftel generally only allocates Telephone Numbers to providers of Public Electronic Communications Networks.

Oftel may also allocate numbers, in circumstances where the provider has been unable to obtain a sub-allocation from a provider of a Public Electronic Communications Network and where number resource implications do not preclude allocation, to providers of Public Electronic Communications Services. Oftel would also normally expect to see that the provider has arrangements in place for its service to be carried over a network.

In order to determine whether or not you are a provider of a Public Electronic Communications Network, Oftel needs certain information from you. Please provide details of:

- a) the Electronic Communications Network on which the Telephone Numbers applied for are intended to be Adopted;

(a diagram may be useful to assist Oftel in assessing your eligibility for Telephone Numbers).

- b) the Electronic Communications Service which you are intending to provide over that network;

Please note that it is not Oftel's intention for a Communications Provider to be assessed more than once to determine whether or not it is a provider of a Public Electronic Communications Network. Therefore if you have answered yes to Question A4(a) below, you do not need to answer questions A1(a) and (b) above,

or

<p><u>A3. Interconnection arrangements</u></p> <p>Describe your Interconnection arrangements (or those of the provider of a Public Electronic Communications Network on whose network the Telephone Numbers applied for would be Adopted), if any, with other Communications Providers – a simple network diagram may be useful.</p>
