London E14 9SX

Dear Mr. Redwin,

Consolidated Wireless Telegraphy License Exemption Regulation

On behalf of Synad Technologies Ltd, I am writing to you in support of the Final Proposals on the Proposed Consolidated Wireless Telegraphy License-Exemption Regulation, recently issued by the Secretary of State and the Radiocommunications Agency.

Synad Technologies Ltd is a UK based Fabless semiconductor manufacturer specializing in dual band (2.4GHZ and 5GHz) RLAN products and is a member of the Wi-Fi Alliance. We strongly support the Agency's proposals in the consultation, and believe that permitting public RLAN use of 5 GHz spectrum, in conformity with global trends, will provide significant benefits to the citizens of the United Kingdom.

Further we consider additional spectrum allocation at 2.4GHz or below should be considered for future release to support increased public use of RLANs. It is important that spectrum below the current 2.4GHz is used for this purpose as increased range is required for more cost effective deployment of RLANs into public spaces. We firmly believe that such allocation would be a enabler for numerous high bandwidth radio applications. As with the early adoption of cellular telephony we predict UK business users would draw immense commercial benefit from such an enabling technology, and it would also promote the UK as a world leader in RLAN technology.

Yours Sincerely

Mr.M.P.Baker
Chief Executive Officer
