

Multi Point – Technical Standards Working Group

Terms of Reference

The Multi Point – Technical Standards Working Group [MP – TSWG] will report, and provide technical standardisation advice to the following groups:

- Fixed Links Consultative Committee
- 5 GHz Advisory Group
- Public Fixed Wireless Consultative Committee
- Broadband Fixed Wireless Access Consultative Group

This group [MP – TSWG] will co-ordinate and develop the necessary UK standardisation work for Fixed Service Multi Point systems. This work will encompass the equipment standardisation activities of ETSI and IEEE arenas and coexistence of such systems. The group will provide regular reports to the above groups.

Membership

As detailed for the FLCC, BFWACG & PFWACC, 5 GHz Advisory Group

Reporting

The MP - TSWG, will report directly into the groups listed as above.

Documentation

As far as is practicable, meeting documents will be distributed by e-mail up to 2 working days prior to the meeting and attendees will be expected to supply their own copies for use in the meetings.

Working Practice

Correspondence between the meetings is encouraged in order to avoid lengthy discussion in the limited time available during the meetings.
