Description of character of service

Revival Radio is a service with a Christian perspective for the people of Cumbernauld. It meets many of the informational, social, and spiritual needs of all members of the community. It will provide a full range of Christian music and programming.

The service broadcasts:

- Music. The main types of music broadcast over the course of the week are: Easy listening, contemporary Christian pop, rock and dance, gospel, country, traditional Christian music, classical and mainstream secular and specialist music shows.
- Speech: The main types of speech output broadcast over the course of each week are: local news and information, traffic and weather reports, sports coverage, interviews and discussions, Christian-based programming including coverage of local church services and a Christian news programme.
- The service provides original output¹ for a minimum of six hours per weekday.
- The service provides locally-produced output² for a minimum of 13 hours per day.

The studio is located within the licensed coverage area.

The service provides a range of community benefits (social gain objectives mandated by statute) for the target community, both on-air and off-air, and in doing so, achieves the following objectives:

- the facilitation of discussion and the expression of opinion,
- the provision (whether by means of programmes included in the service or otherwise) of education or training to individuals not employed by the person providing the service, and
- the better understanding of the particular community and the strengthening of links within it.

Members of the target community contribute to the operation and management of the service.

The service has mechanisms in place to ensure it is accountable to its target community.

[September 2006. Revised September 2016.

¹ Original output is output that is first produced for and transmitted by the service, and excludes output that was transmitted elsewhere before. Original output can be live or voice-tracked. Repeat broadcasts of original output do not count towards the minimum requirement.

² Locally-produced output is output made and broadcast from within the service's licensed coverage area.
