Licence number: CR000117

Service name	Glastonbury FM
Licence area	Glastonbury (as shown in the licensed coverage area map)
Frequency	107.1 MHz

Description of character of service

Glastonbury FM is for people in Glastonbury, Street, Wells and surrounding villages. It provides an entertaining and informative service, broadcasting a wide range of locally- sourced music, news, information and topical issues relating to the target community.

- Music. The main types of music broadcast over the course of each week are: a diverse range of genres.
- Speech: The main types of speech output broadcast over the course of each week are: interviews, studio discussions, news reports, and information of relevance to the target community.
- The service provides original output¹ for a minimum of 30 hours per week.
- The service provides locally-produced output² for a minimum of 30 hours per week.

The studio is located within the licensed coverage area.

The service provides a range of community benefits (social gain objectives mandated by statute) for the target community, both on-air and off-air, and in doing so, achieves the following objectives:

- the facilitation of discussion and the expression of opinion,
- the provision (whether by means of programmes included in the service or otherwise) of education or training to individuals not employed by the person providing the service, and
- the better understanding of the particular community and the strengthening of links within it.

Members of the target community contribute to the operation and management of the service.

The service has mechanisms in place to ensure it is accountable to its target community.

[November 2008. Revised January 2014; September 2016; January 2024]

¹ Original output is output that is first produced for and transmitted by the service, and excludes output that was transmitted elsewhere before. Original output can be live or voice-tracked. Repeat broadcasts of original output do not count towards the minimum requirement.

² Locally-produced output is output made and broadcast from within the service's licensed coverage area.
