

What do you want Ofcom to keep confidential?:

Keep part of the response confidential

If you want part of your response kept confidential, which parts?:

Do not publish my contact details

Ofcom may publish a response summary:

Yes

I confirm that I have read the declaration:

Yes

Ofcom should only publish this response after the consultation has ended:

You may publish my response on receipt

Additional comments:

Question 1: Do you agree that copy management would broaden the range of HD content available on DTT and help secure its long term viability as a platform? :

No, the BBC does not have a good track record of implementing software for the minority operating systems (who's users still pay their license fees and therefore should be fairly represented). This inability gives no confidence any implementation would work correctly and not simply exclude people.

Question 2: Do you agree that the BBC's proposed multiplex licence amendment represents the most appropriate means for securing an effective content management system on HD DTT? :

No

Question 3: Do you agree with the proposed change to Condition 6 in the Multiplex B Licence? :

No

Question 4: Do you agree that Multiplexes C and D should be granted a similar amendment to their Licences as Multiplex B?. :

No

Question 5: Do you agree that the BBC's proposed approach for implementing content management would safeguard citizens and consumers legitimate use of HD content, and if not, what additional guarantees would be appropriate? :

They must guarantee that all users will be represented at the same time in the same way, whether 32 bit, 64 bit, Windows, Linux, Mac, etc). Not some half baked implementation that takes years to reach the minority users, unless they want to refund part of our license fees.

Question 6: Do you agree that the BBC's proposed choice of content management technologies will have only a negligible impact on the cost of HD DTT receivers and their interoperability with other HD consumer equipment? . :

No, have they considered all the affected technologies? What about people running HD DTT through Linux?

Question 7: Do stakeholders agree that the BBC's proposed Huffman Code licensing arrangements would have a negligible effect on the market for HD DTT receivers? :

Pass

Question 8: Do the BBC's proposed content management states and their permitted use for different categories of HD content meet the requirements of other HD broadcasters on DTT? . :

Pass

Question 9: Are there any issues that you consider Ofcom should take into account in assessing the BBC's proposal, that have not been addressed by this consultation?:

As mention before their inability to support the minority OS users with iPlayer even after all this time, despite paying our license fees does not give credulity that they can implement anything else. Maybe they should fix their current software first, before embarking on further plans.
