

## Consultation response form

<b>Consultation title</b>	Improving access to 5.8 GHz spectrum for broadband fixed wireless access
<b>Full name</b>	Hal Ponton
<b>Representing (delete as appropriate)</b>	Organisation
<b>Organisation name</b>	Buz Broadband Ltd / FibreWiFi

## Your response

<b>Question 1: Do you agree with our assessment of current road tolling use in the 5.8 GHz band in the UK? Is there other current and future planned use that we are not aware of?</b>	Confidential? –N Yes I agree with the review of the RTTT use across the UK. I believe however, that the Dartford Crossing moved to an ANPR system with their recent upgrades to the road network there.
<b>Question 2: Do you agree with our analysis of the options for managing sharing between BFWA and RTTT? Are there additional options which we have not considered which in your opinion would result in a better balance of benefits and risks?</b>	Confidential? –N Yes we agree with the analysis and the recommendation of Option 4 to be implemented. BWFA operators are already used to changing frequencies when required so this will add no change to procedures.
<b>Question 3: Do you agree with our proposal to remove the notch and allow BFWA use in the whole of the 5.8GHz band?</b>	Confidential? –N Yes we agree with this proposal
<b>Question 4: Are there any other considerations that you believe need to be taken into account and that are not already covered in this consultation?</b>	Confidential? –N At this time we cannot think of any additional considerations that need to be considered.
