# Made outside London programme titles register 2017

---

**Publication Date:** 17 July 2018

**Revised:** 14 May 2021

# About this document

---

This document sets out the titles of programmes that the BBC, ITV, Channel 4 and Channel 5 reported as 'Made outside London' productions broadcast during 2017. The region outside of the M25 that the production qualified as being made in, and the criteria which the production met to qualify as a regional production are included alongside the title. Where the production was made by an external production company, the name of the company is indicated. Where this column is blank, the content was made by the broadcaster.

## Revisions as of 2021

The 2017 register has been updated to reflect the findings from Ofcom's increased monitoring of broadcaster Made Outside London returns.

*Tenable* (ITV) has been removed from the register, as the production was found not to have met the criteria necessary to count towards ITV's Made Outside London hours quota.

ITV continues to meet its 2017 Regional Production quota obligations in full.

# Contents

## Section

1. Regional production requirements	1
2. Overview	2
3. Made outside London programme titles register	3

# 1. Regional production requirements

- 1.1 The Communications Act 2003 (Sections 286 and 288) and the BBC Agreement require that a suitable proportion of programmes are made outside the M25. Each public service broadcaster (“PSB”) must meet the quotas for regional productions specified in its licence. Ofcom’s guidance explains that only first-run programmes that qualify as regional productions may count towards these quotas.
- 1.2 To qualify as a regional production, at least two of the following three criteria must be met:
  - a) The production company must have a substantive business and production base in the UK outside the M25<sup>1</sup>;
  - b) At least 70% of the production budget (excluding some specific costs<sup>2</sup>) must be spent in the UK outside the M25; and
  - c) At least 50% of the production talent by cost must have their usual place of employment in the UK outside the M25.
- 1.3 Each regional production must be assigned to either Scotland, Wales or Northern Ireland, one of three English macro-regions, or be labelled as ‘Other’ if the substantive base criteria is not met, and the production budget and production talent criteria were achieved, but were not met in a single macro-region.
- 1.4 Further detail on the current regional production definitions is available on the Ofcom website: [https://www.ofcom.org.uk/\\_data/assets/pdf\\_file/0019/87040/Regional-production-and-regional-programme-definitions.pdf](https://www.ofcom.org.uk/_data/assets/pdf_file/0019/87040/Regional-production-and-regional-programme-definitions.pdf)
- 1.5 Ofcom is currently reviewing the regional production and regional programming guidance for broadcasters. In March 2018, Ofcom published a call for evidence as the first stage of this review. Stakeholder responses to the call for evidence have been published on our website. A consultation on the guidance will follow later this year.

---

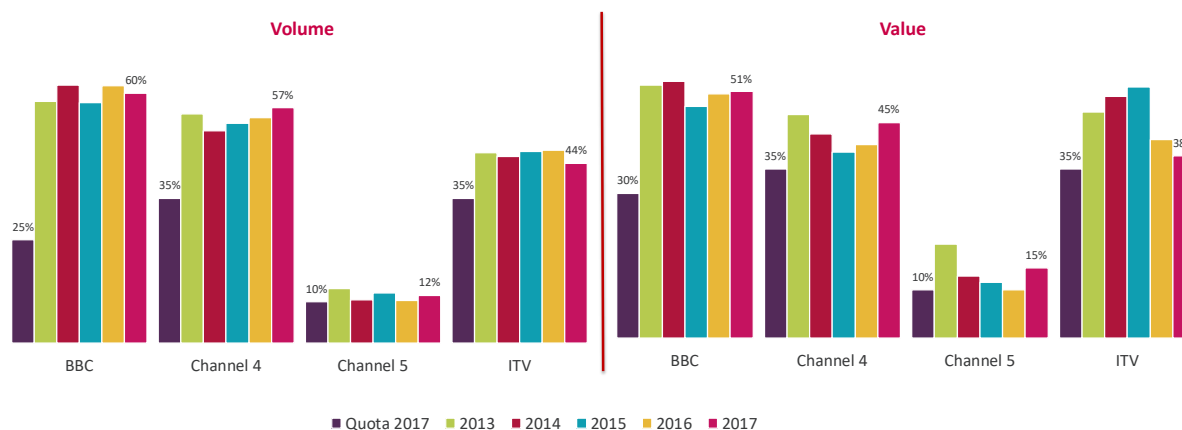

<sup>1</sup> A base will be taken to be substantive if it is the usual place of employment of executives managing the regional business, of senior personnel involved in the production in question, and of senior personnel involved in seeking programme commissions.

<sup>2</sup> On-screen talent, archive material, sports rights, competition prize-money and copyright costs.

## 2. Overview

2.1 In 2017, the BBC, ITV, Channel 4 and Channel 5 report that they met both their value and volume-based regional production quotas, shown in Figure 1.

**Figure 1: Performance against regional production quotas: 2013 to 2017**

Source: Ofcom / broadcasters

2.2 In 2017, the PSBs broadcast a total of 933 titles that qualified as made outside London programming. Of these, 403 were produced by external production companies, with the remainder being made in-house by the broadcasters.

2.3 The register shows that:

- For 92% of titles, the producer/broadcaster had a substantive base in the region to which the title was assigned
- The production spend criterion was met by 92% of titles
- The production talent criterion was met by 98% of titles

2.4 Northern England was the macro-region where the highest proportion of titles met all three criteria (95%). Midlands & East had the lowest proportion of titles that met all three criteria (62%). In Northern England and in Northern Ireland, all qualifying titles were reported as having met the production talent criterion.

2.5 A full list of titles, regions, and the criteria which each title met to qualify as a regional production follows. The production company responsible for producing the content is also listed, where relevant. This list does not relate to the independent production quota. It is published to provide further information on how the PSBs met their regional production requirements.

2.6 This list does not include titles commissioned by S4C, produced for the BBC for either S4C or BBC Alba or titles that were made available on broadcast television only to viewers in one of the UK nations or English regions.

## 3. Made outside London programme titles register
