

**Response to *Geographic telephone numbers: safeguarding the future of geographic numbers***

**Submitted by: Wright, Mr D**

**Additional comments:**

Many people (including myself) only have a landline phone in order to have broadband access. I don't want/need/use landline voice services and would need to look up my phone number if I ever needed it. I would be delighted if I could give up my phone number and line rental.

**Question 1-27:** no comment
