

What do you want Ofcom to keep confidential?:

Keep name confidential

If you want part of your response kept confidential, which parts?:

Ofcom may publish a response summary:

Yes

I confirm that I have read the declaration:

Yes

Ofcom should only publish this response after the consultation has ended:

You may publish my response on receipt

Additional comments:

Question 1: Do you agree that copy management would broaden the range of HD content available on DTT and help secure its long term viability as a platform? :

No

Question 2: Do you agree that the BBC's proposed multiplex licence amendment represents the most appropriate means for securing an effective content management system on HD DTT? :

No

Question 3: Do you agree with the proposed change to Condition 6 in the Multiplex B Licence? :

No

Question 4: Do you agree that Multiplexes C and D should be granted a similar amendment to their Licences as Multiplex B?. :

No

Question 5: Do you agree that the BBC's proposed approach for implementing content management would safeguard citizens and consumers legitimate use of HD content, and if not, what additional guarantees would be appropriate? :

No

Question 6: Do you agree that the BBC's proposed choice of content management technologies will have only a negligible impact on the cost of HD DTT receivers and their interoperability with other HD consumer equipment? . :

No. Prices can only go up as additional licences for the decoding algorithms will be payable. Also, there will always be different versions of said algorithms and so there will be incompatibilities between equipment.

Question 7: Do stakeholders agree that the BBC's proposed Huffman Code licensing arrangements would have a negligible effect on the market for HD DTT receivers? :

Don't know

Question 8: Do the BBC's proposed content management states and their permitted use for different categories of HD content meet the requirements of other HD broadcasters on DTT? . :

Don't know

Question 9: Are there any issues that you consider Ofcom should take into account in assessing the BBC's proposal, that have not been addressed by this consultation?:

We should have the right to time-shift programmes and view them on whatever devices we see fit. The state/BBC/commercial organisations should have no right to dictate limitations to that right.

Free-to-air/view Freeview content, whether SD or HD, should not be DRM limited. In order to make a level playing field, this should also be extended to all other providers - Sky, Virgin, etc. If the same rules apply to all UK providers then the rights owners will have no choice but to provide their content even if they don't like the terms.
