Hours of daily TV and radio use by nation, 2010

Source: BARB. i) TV: PSBs = BBC One, BBC Two, ITV1, C4+S4C, Five. (ii) Radio : PSBs = all BBC radio stations.

Notes: For England TV, a range is displayed reflecting the regions with the highest and lowest average daily viewing figures respectively

For Wales, TV viewing hours shows an increase of 0.9 hours on 2009 figures. While it is likely that there has been an increase in viewing in Wales, due to digital switchover, this increase may also be attributable to the effects of the new BARB panel introduced at the start of 2010. There are two important changes to note regarding the new BARB panel: 1) The panel is based on completely different viewers to the previous panel, so data comparisons pre- and post-2010 should be viewed with caution. 2) There was a redefining of border boundaries under the new panel change. Previously, viewing of C4 in some areas registered as 'out of area' and so did not count towards the Wales area viewing figures; under the new panel and re-defined regions, however, viewing of C4 in these regions is now included.
