

Title:

Mrs

Forename:

Lisa

Surname:

Morrison

Representing:

Self

Organisation (if applicable):

Email:

What do you want Ofcom to keep confidential?:

Keep part of the response confidential

If you want part of your response kept confidential, which parts?:

My email address. Clearly nobody wants their email address publicly published.

Ofcom may publish a response summary:

Yes

I confirm that I have read the declaration:

Yes

Ofcom should only publish this response after the consultation has ended:

You may publish my response on receipt

Additional comments:

Question 1: Do you agree that copy management would broaden the range of HD content available on DTT and help secure its long term viability as a platform? :

No, I don't see how restrictions should be used. There are a great many freeview boxes out there and NONE support any type of DRM, the people who have bought freeview boxes for

the digital switchover will lose out, because I doubt many will have the need or want to replace the equipment they have ONLY JUST BOUGHT.

Question 2: Do you agree that the BBC's proposed multiplex licence amendment represents the most appropriate means for securing an effective content management system on HD DTT? :

No. I don't believe there should be any Content Management.

Question 3: Do you agree with the proposed change to Condition 6 in the Multiplex B Licence? :

Question 4: Do you agree that Multiplexes C and D should be granted a similar amendment to their Licences as Multiplex B?. :

Question 5: Do you agree that the BBC's proposed approach for implementing content management would safeguard citizens and consumers legitimate use of HD content, and if not, what additional guarantees would be appropriate? :

If the BBC, which we all pay for provides the freeview boxes with the DRM enabled. FREE OF CHARGE (TV license should pay) then it might be the best way to approach the issue.

Question 6: Do you agree that the BBC's proposed choice of content management technologies will have only a negligible impact on the cost of HD DTT receivers and their interoperability with other HD consumer equipment? . :

No, I should suspect it would have a major impact on the cost of boxes, leaving aside the point that people will have to buy new equipment in the first place.

Question 7: Do stakeholders agree that the BBC's proposed Huffman Code licensing arrangements would have a negligible effect on the market for HD DTT receivers? :

Question 8: Do the BBC's proposed content management states and their permitted use for different categories of HD content meet the requirements of other HD broadcasters on DTT? . :

Question 9: Are there any issues that you consider Ofcom should take into account in assessing the BBC's proposal, that have not been addressed by this consultation?:

Think very carefully before applying further costs to the general public.

Times are tight, and, if the BBC move ahead with DRM the public will end up having to pay for a TV license when they can't even watch the new HD content by the BBC.

The programs provided by the BBC should be available for everybody to use, not just the people with fancy new STB technology.
