
Made outside London programme titles register 2020

Overview

This document sets out the titles of programmes that the BBC, ITV, Channel 4 and Channel 5 reported as ‘Made outside London’ productions broadcast during 2020. The nation or region outside of the M25 that the production qualified as being made in, the criteria which the production met to qualify as a regional production, and the number of episodes of each production are included alongside the title. Where the production was made by an external production company, the name of the company is indicated. Where this column is blank, the content was made by the broadcaster.

The nation or region in which each criterion was met in is also specified for each title.

The made outside London programme titles register, and further information about the public service broadcasters’ delivery against their regional production quotas, are available as interactive data in our [PSB annual compliance report](#).

More information about [regional production and programming](#) is available on the Ofcom website.

Regional production requirements

The Communications Act 2003 (Sections 286 and 288) and the BBC Agreement require that a suitable proportion of programmes are made outside the M25. Each public service broadcaster (“PSB”) must meet the quotas for regional productions specified in its licence. Ofcom’s guidance explains that only first-run programmes that qualify as regional productions may count towards these quotas.

To qualify as a regional production, at least two of the following three criteria must be met:

- a) The production company must have a substantive business and production base in the UK outside the M25¹;
- b) At least 70% of the production budget (excluding some specific costs²) must be spent in the UK outside the M25; and
- c) At least 50% of the production talent by cost must have their usual place of employment in the UK outside the M25.

Each regional production must be assigned to either Scotland, Wales or Northern Ireland, one of three English macro-regions, or be labelled as ‘Other’ if the substantive base criteria is not met, and the production budget and production talent criteria were achieved, but were not met in a single macro-region.

Further detail on the [current regional production definitions](#) is available on the Ofcom website.

¹ A base will be taken to be substantive if it is the usual place of employment of executives managing the regional business, of senior personnel involved in the production in question, and of senior personnel involved in seeking programme commissions.

² On-screen talent, archive material, sports rights, competition prize-money and copyright costs.

Ofcom reviewed the regional production and regional programming guidance for broadcasters and in June 2019, we published updated guidance for the PSBs, which came into effect for programmes broadcast from January 2021. The [updated guidance](#), and the accompanying statement concluding our review of the guidance, is available on our website.

Impact of Covid-19

Production restrictions due to Covid-19 had significant impacts on broadcasters' performance against quotas, as some productions could not take place during lockdown measures, or were delayed. This impacted Made Outside London quotas, and quotas on networked programming produced out of England, which are detailed in our [PSB annual compliance report](#).

Further information about [Ofcom's broadcast standards during the pandemic](#) is available on our website.
