The following part(s) of this response are confidential:  
Nothing

Can Ofcom still publish a reference to the contents of your response (including, for any confidential parts, a general summary that does not disclose the specific information or enable you to be identified)?

I confirm that the correspondence supplied with this cover sheet is a formal consultation response that Ofcom can publish. However, in supplying this response, I understand that Ofcom may need to publish all responses, including those which are marked as confidential, in order to meet legal obligations. If I have sent my response by email, Ofcom can disregard any standard e-mail text about not disclosing email contents and attachments.

Do you consider that the requirement to ensure equivalent services for disabled end-users would require a mandated VR service in some form for BSL users?

Yes. I think an unrestricted Video Relay Service is the only way to ensure a telecoms service for BSL users which is equivalent to that used by hearing people.

There are people out there in the big world that need to communicate outside of those hours suggested and VRS is the only way.

Do you agree that a restricted service would be more proportionate in providing equivalence for BSL users than an unrestricted service?

No. I do not agree with the proposal to impose restrictions on access to VRS. An unrestricted Video Relay Service is the only way to ensure a telecoms service for BSL users which is equivalent to that used by hearing people. Surely the human rights of those of us that use BSL must be taken into consideration or are we about to drift back into the dark ages where people with disabilities shouldn't be heard or seen.

Please provide your views on Methods 1 - 5 for a restricted VR service discussed above. Are there any other methods that are not mentioned that we should consider?

I do not agree with any of the proposed methods of restricting access to VRS. An unrestricted Video Relay Service is the only way to ensure a telecoms service for BSL users which is equivalent to that used by hearing people.

Do you agree that a monthly allocation of minutes combined with a weekday/business hours service would be the most appropriate means to restricting the service?

No. I do not agree with the proposal to impose these restrictions on access to VRS. An unrestricted Video Relay Service is the only way to ensure a telecoms service for BSL users which is equivalent to that used by hearing people.
