

Additional comments:-

Sorry I made mistake when emailing before, This is the correct one. I have been in UK for many years and my wife family and relatives is in Pakistan. It is very expensive to call home so i looked on the internet and found websites that offer cheap international calls. I have 1 orange 1 T.Mobile contract so i am paying a lot of money already. Over the years many times Orange have charged me suddenly without any notice for calling these access numbers. So when I found the 03 service I was happy as they cannot suddenly charge me without at least informing me. I was using the service until it was suspended due to Orange blocking the 03 number and I was no longer able to call. This is clearly not fair. I have already paid for a unlimited landline service and this should allow me to cal 01 02 and 03 numbers however Orange EE are so tight that they dont want anyone making cheaper calls and want to rip off customers by charging more than £1 a minute to call pakistan mobile, when i can it is using the 03 numbers at no extra cost.

Questions

Question 3.1:

Do you agree that the modification to the Numbering Plan that we propose –which would prohibit direct or indirect revenue-sharing with callers and/or end-users by those who use 03 numbers–is appropriate and proportionate to address the conduct of concern that we have described in this document? If not, please explain why.

I do not agree because if you do go ahead I will no longer be able to call my wife family & relatives in Pakistan as it would be too expensive

Question 4.1:

Do you have any comments on the draft modifications to the Numbering Plan that we are proposing, as set out in Annex 7? Where you disagree with any of the proposed modifications, please explain why.

I do not agree because I will not be able to call home and speak to my family.
