

Consultation response form

Question	Your response
Do you have any comments on Ofcom's proposed changes?	<p>Comux would only like to respond to the proposed changes to 'Retention and Production of Recordings' sections 4.16 and 4.17</p> <p>Comux is concerned that the provision to provide compliance recordings in broadcast quality for all of our 34 licensed services, would be prohibitively expensive. This would require Comux to commission a replacement system at considerable cost, with significantly increased storage capacity, and would question the need whether this is necessary. To date Comux is not aware that it has had any quality issues arising from previous recordings provided from its current system which produces files at reduced SD resolution.</p>
