A5. Statutory notification	20

1. Overview

- 1.1 The electronic communications code is a set of rights that are intended to assist providers of communications networks and/or systems of infrastructure. Operators to whom Ofcom applies the Code may:
- construct and maintain communications networks and infrastructure (such as ducts, cabinets and poles) on public highways without the need to obtain a street works licence to undertake such works;
 - construct communications infrastructure which is classified as ‘permitted developments’ under Town and Country Planning legislation (such as certain types of masts, poles and cabinets) without the need to apply for planning permission; and
 - in the event that agreement cannot be reached with the owner or occupier of private land, concerning the deployment of communications networks or infrastructure on private land to apply to the Court to impose an agreement which confers the Code right being sought by the operator or provides for the Code right to bind the landowner or occupier.
- 1.2 We consider applications for the grant of Code powers from providers of electronic communications networks and providers of systems of infrastructure (or both) with reference to the matters set out in section 107(4) of the Communications Act 2003.

What we are proposing – in brief

We are proposing to apply the electronic communications code set out in Schedule 3A to the Communications Act 2003 to UK FIBRE NETWORKS (YORK) LTD, whose registered company number is 11590146, for the purposes of the provision by it of an electronic communications network.

We invite comments on our proposal by 2 June 2024.

We will consider any responses to this consultation before reaching a final decision on whether to grant Code powers to UK FIBRE NETWORKS (YORK) LTD.

2. Background

- 2.1 The electronic communications code (the Code) is set out in Schedule 3A to the Communications Act 2003 (the Act). It is designed to facilitate the installation and maintenance of electronic communications networks.¹ It confers rights on providers of such networks and on providers of systems of infrastructure to install and maintain apparatus on, under and over land and results in considerably simplified planning procedures.
- 2.2 Where the Code is applied in any person's case, it may be subject to restrictions and conditions set out in other legislation from time to time.²

The application of the Code

- 2.3 The Code only has effect in the case of a person to whom it is applied by a direction given by Ofcom (or, in the case of the Secretary of State or any Northern Ireland department, where the Secretary of State or that department is providing or proposing to provide an electronic communications network).³
- 2.4 The only purposes for which the Code may be applied in a person's case by a direction are:
- the purposes of the provision by him of an electronic communications network; or
 - the purposes of the provision by him of a system of infrastructure which he is making available, or proposing to make available, for use by providers of electronic communications networks for the purposes of the provision by them of their networks.⁴
- 2.5 A direction applying the Code to a person may take effect:
- in relation only to such places or localities as may be specified or described in the direction;
 - for the purposes only of the provision of such electronic communications network, or part of an electronic communications network, as may be so specified or described; or
 - for the purposes only of the provision of such system of infrastructure, or part of a system of infrastructure, as may be so specified or described.⁵

Application process for applying the Code

- 2.6 Ofcom must not give a direction applying the Code in any person's case except on an application made for the purpose by that person.⁶

¹ "Electronic communications network" for the purposes of the Code has the same meaning as in section 32 of the Act.

² Section 109 of the Act – see the Electronic Communications Code (Conditions and Restrictions) Regulations 2003 (SI 2003 No. 2553), as amended by the Electronic Communications Code (Conditions and Restrictions) (Amendment) Regulations 2009 (SI 2009 No. 584), the Electronic Communications Code (Conditions and Restrictions) (Amendment) Regulations 2013 (SI 2013 No. 1403) and the Electronic Communications Code (Conditions and Restrictions) (Amendment) Regulations 2017 (SI 2017/753).

³ Section 106(3)(b) of the Act.

⁴ Section 106(4) of the Act.

⁵ Section 106(5) of the Act.

⁶ Section 107(1) of the Act.

- 2.7 Any such application must be made in accordance with the requirements for the time being in force with respect to the content of an application for a direction applying the Code and the manner in which such an application is to be made.⁷

Time limit for making a decision on applications for the Code

- 2.8 Regulation 3(2) of the Electronic Communications and Wireless Telegraphy Regulations 2011⁸ provides that, except in cases of expropriation, Ofcom must make its decision within 6 months of receiving the completed application. In other words, that time limit applies from the moment Ofcom receives an application that fully complies with the requirements described above.

Statutory consultation process on proposal

- 2.9 Before giving a direction applying the Code to the Applicant in question, Ofcom must publish a notification of its proposal to give the direction and consider any representations about that proposal that are made to Ofcom within the period specified in the notification.⁹
- 2.10 Such a notification must contain the following¹⁰:
- a) a statement of Ofcom's proposal;¹¹
 - b) a statement of Ofcom's reasons for that proposal;
 - c) a statement of the period within which representations may be made to Ofcom about the proposal (which period must end no less than 30 days after the day of the publication of the notification¹²).
- 2.11 Ofcom must publish a notification in such manner as Ofcom considers appropriate for bringing the notification to the attention of the persons who, in Ofcom's opinion, are likely to be affected by it.¹³
- 2.12 The notification published at Annex 5 to this document is a notification for such purposes and should be read in conjunction with the entirety of this document, including the reasons set out in Section 3.

⁷ Section 107(2) of the Act. For the current requirements, see the Notification under section 107(2) of the Communications Act 2003, dated 6 October 2003, at Annex B to the statement entitled 'The Granting of the Electronic Communications Code by the Director General of Telecommunications – A Statement issued by the Director General of Telecommunications', published on 10 October 2003

⁸ SI 2011 No. 1210.

⁹ Section 107(6) of the Act.

¹⁰ Section 107(7) of the Act.

¹¹ Subject to sections 113(7) and 115(5) of the Act, the statement of Ofcom's proposal must contain a statement that Ofcom proposes to apply the code in the case of the person in question and set out any proposals of Ofcom to impose terms under section 106(5); see section 107(8) of the Act.

¹² Section 107(9) of the Act.

¹³ Section 107(10) of the Act.

Relevant considerations in making a decision (four factors)

- 2.13 In considering whether to apply the Code in any person's case, Ofcom must have regard, in particular, to each of the following matters¹⁴:
- a) the benefit to the public of the electronic communications network or system of infrastructure by reference to which the Code is to be applied to that person;
 - b) the practicability of the provision of that network or system without the application of the Code;
 - c) the need to encourage the sharing of the use of electronic communications apparatus;
 - d) whether the person in whose case it is proposed to apply the Code will be able to meet liabilities arising as a consequence of the application of the Code in that person's case and any conduct of that person in relation to the matters with which the Code deals.
- 2.14 For the purposes of this process, those four factors rank equally with Ofcom's statutory duties under sections 3 and 4 of the Act.¹⁵ Where appropriate, outside of those statutory considerations, we will also have regard to any additional factors that, in our opinion, are relevant to the particular application.

Statutory duties

General duties

- 2.15 In carrying out its functions under the Act (which includes giving a direction to apply the Code), Ofcom's principal duty as set out in section 3 of the Act is to further the interests of citizens in relation to communications matters and to further the interests of consumers in relevant markets, where appropriate by promoting competition.
- 2.16 In so doing, we are required to secure a number of specific objectives and to have regard to a number of matters set out in section 3. As to the prescribed specific statutory objectives in section 3(2), we consider that the objective of securing the availability throughout the UK of a wide range of electronic communications services is particularly relevant to this consultation.
- 2.17 In performing its duties, Ofcom is also required to have regard to a range of other considerations, which appear to us to be relevant in the circumstances. In this context, we consider that a number of such considerations are relevant, particularly:
- a) the desirability of promoting competition in relevant markets;
 - b) the desirability of encouraging investment and innovation in relevant markets; and
 - c) the desirability of encouraging the availability and use of high-speed data transfer services throughout the United Kingdom.
- 2.18 We have also had regard to the principles under which regulatory activities should be transparent, accountable, proportionate, consistent, and targeted only at cases in which action is needed, as well as the interest of consumers in respect of choice, price, quality of service and value for money.

¹⁴ Section 107(4) of the Act.

¹⁵ Section 107(5) of the Act.

2.19 Ofcom has a wide measure of discretion in balancing its statutory duties and objectives. In so doing, we will take account of all relevant considerations, including any responses received during this consultation process, in reaching our conclusions.

Specific duties in relation to certain regulatory functions

2.20 When carrying out certain functions such as giving a direction to apply the Code, section 4 of the Act requires us to act in accordance with the six requirements set out in that section.

2.21 In summary, these six requirements are:

- a) to promote competition in the provision of electronic communications networks and services, associated facilities and the supply of directories;
- b) to promote the interests of all members of the public in the United Kingdom;
- c) to take account of the desirability of Ofcom's carrying out of its functions in a manner which, so far as practicable, does not favour one form of or means of providing electronic communications networks, services or associated facilities over another, i.e. to be technologically neutral;
- d) to encourage, to such extent as Ofcom considers appropriate for certain prescribed purposes, the provision of network access and service interoperability, namely securing efficiency and sustainable competition, efficient investment and innovation and the maximum benefit for customers of communications providers and of persons who make associated facilities available;
- e) to encourage compliance with certain standards as is necessary to facilitate service interoperability; facilitate end-to-end connectivity; facilitate the changing by end-users of their communications provider; facilitate the retention by end-users of their telephone numbers after a change of communications provider; and secure freedom of choice for the customers of communications providers.
- f) to promote connectivity and access to very high-capacity networks by members of the public and businesses in the United Kingdom.

2.22 We consider that the first, second, fourth and sixth of those requirements are of particular relevance to our proposal in this consultation and that no conflict arises in this regard with the specific objectives in section 3 which we have identified above as particularly relevant in this context.

Impact assessment

2.23 Section 7 of the Communications Act requires us to carry out and publish an assessment of the likely impact of implementing a proposal which would be likely to have a significant impact on businesses or the general public, or when there is a major change in Ofcom's activities.

2.24 More generally, impact assessments form part of good policy making and we therefore expect to carry them out in relation to a large majority of our proposals. We use impact assessments to help us understand and assess the potential impact of our policy decisions before we make them. They also help us explain the policy decisions we have decided to take and why we consider those decisions best fulfil our applicable duties and objectives in

the least intrusive way. Our impact assessment guidance sets out our general approach to how we assess and present the impact of our proposed decisions.¹⁶

- 2.25 The relevant duties in relation to the proposal on which we are consulting are set out above. As discussed in paragraph 2.13, these include the four factors which we are required to have particular regard to when considering whether to apply the Code in a person's case. We consider these are particularly relevant to our assessment of the impact of this proposal.
- 2.26 We expect this proposal to have an overall positive impact for citizens and consumers because the grant of Code powers will facilitate the deployment and expansion of an electronic communications network by the applicant as described in section 3.
- 2.27 We expect the deployment of such networks or infrastructure systems to improve the quality of services available and help meet the growing needs of people and businesses for connectivity. Where providers expand their network coverage, we expect competition to fuel innovation and customer choice.
- 2.28 In section 3, we have also summarised the benefits which the Applicant considers would be associated with the proposed network deployment.
- 2.29 For completeness, we note that street works associated with the proposed network deployment may cause short term disruption to citizens. This could include street closures, traffic restrictions and noise associated with works to install electronic communications apparatus. There may also be a visual impact if the Applicant deploys apparatus such as cabinets, poles and overhead lines. We note that operators to whom the Code is applied have rights to deploy electronic communications apparatus in public highways, subject to certain obligations as set out in conditions and restrictions attached to the Code, street works legislation and planning legislation. These obligations include requirements relating to the conduct of street works, the types of apparatus that may be installed, the visual impact of apparatus and the applicable planning requirements.
- 2.30 In considering the potential impact of the proposal on which we are consulting, we have considered the following key options:
- a) give a direction to apply the Code to the Applicant; or
 - b) not to give such a direction.

Equality impact assessment

- 2.31 We have given careful consideration to whether our proposal will have a particular impact on persons sharing protected characteristics (broadly including race, age, disability, sex, sexual orientation, gender reassignment, pregnancy and maternity, marriage and civil partnership and religion or belief in the UK and also dependents and political opinion in Northern Ireland), and in particular whether they may discriminate against such persons or impact on equality of opportunity or good relations. This assessment helps us comply with our duties under the Equality Act 2010 and the Northern Ireland Act 1998.¹⁷

¹⁶ Ofcom, [Impact Assessment Guidance](#), July 2023.

¹⁷ Further detail is set out in section 149 of the Equality Act 2010 and section 75 of the Northern Ireland Act 1998.

- 2.32 When thinking about equality we think more broadly than persons that share protected characteristics identified in equalities legislation and think about potential impacts on various groups of persons (see paragraph 4.7 of our [impact assessment guidance](#))]
- 2.33 In particular, section 3(4) of the Communications Act also requires us to have regard to the needs and interests of specific groups of persons when performing our duties, as appear to us to be relevant in the circumstances. These include:
- the vulnerability of children and of others whose circumstances appear to us to put them in need of special protection;
 - the needs of persons with disabilities, older persons and persons on low incomes; and
 - the different interests of persons in the different parts of the UK, of the different ethnic communities within the UK and of persons living in rural and in urban areas.
- 2.34 We consider that our proposals may have a positive impact on specific groups of persons (including persons that share protected characteristics under the 2010 Act or the 1998 Act) differently to the general population. As noted in our impact assessment above, our proposal will facilitate the deployment of an electronic communications network infrastructure by the Applicant which we expect to have an overall positive impact on citizens. Specific groups may benefit more than the general population, depending on the locations that the Applicant chooses to deploy its network. For example, the Applicant may deploy its network in locations where those with protected characteristics are particularly represented or in urban or rural areas, which may help advance equality of opportunity in those areas.
- 2.35 In section 3, we have described the differential effects that we have identified. However, given the narrow scope of our proposal and that the locations where the Applicant ultimately deploys its network are at its discretion, we have not sought to undertake a detailed assessment of these positive differential impacts.

3. Reasons for proposal

3.1 This section contains our reasons for proposing to apply the Code to UK FIBRE NETWORKS (YORK) LTD.

Factual matters

The Applicant and the Code powers applied for

3.2 On 4 October 2023 we received an application that meets the statutory requirements.¹⁸

3.3 The person seeking Code powers (the Applicant) is:

- Company name: UK FIBRE NETWORKS (YORK) LTD
- Registered company number: 11590146
- Registered office: York Hub Popes Head Court Offices, Peter Lane, York, England, YO1 8SU

3.4 The Applicant has applied to Ofcom for a direction applying Code powers under section 106(4)(a) of the Act. Namely, for the purposes of the provision by the Applicant of an electronic communications network.

Description and location of the network for Code powers

3.5 Summary description of network proposed by the Applicant:

- The Applicant began serving customers in 2019 providing gigabit-capable fibre broadband to York town centre.
- The Applicant sells broadband and VOIP services; its packages offer broadband speeds starting at 150Mbps up to 900Mbps for all customers. Furthermore, UK Fibre Networks offers its full-fibre services via overhead cables, rather than the typical underground cables, which results in less disruption to customers and less disruption for the public. The speeds offered are much faster than average speeds today and much better than the variable speeds experienced on copper lines that many other providers offer. In contrast to its fibre competitors, UK Fibre Networks aims to deliver its wireless services within – ten (10) days of an accepted order.
- The Applicant is predominantly self-funded with some funding obtained from Digital Enterprise grants. There is also some potential to attract funding in the future from bespoke Gigabit funding / the UK Government’s Gigabit Broadband Voucher Scheme.
- The Applicant does not currently own any ducting, nor does it currently undertake any civil works. Currently, it leases backhaul services from Tier 1 carriers under wholesale contracts. In the future, it may expand its network by using Openreach’s PIA to install its own ducting and poles, whether on private land or public highway but currently overhead cables are the default installation position.

¹⁸ Notification under Section 107(2) of the Communications Act 2003. Annex B to the statement entitled ‘The Granting of the Electronic Communications Code by the Director General of Telecommunications – A Statement issued by the Director General of Telecommunications’, published on 10 October 2003.

- The Applicant is willing, wherever contractually possible, to share its network with other operators and envisages that the new networks will be based on end-to-end network slicing which will enable multiple mobile and fixed line operators to share a single infrastructure.
 - The Applicant has applied for Code Powers because experience shows that without Code Powers, they will have to pay extortionate associated costs to freeholders, should any further wayleave agreements need to be entered into. Moreover, there may be unreasonable terms proposed by any freeholders, such as unfair termination rights, if Code Powers were not granted.
- 3.6 The Applicant operates a Fibre to the Premises (FTTP) network in York. The Applicant seeks Code powers to facilitate the expansion of its FWA network and the deployment of a FTTP network in York, Bath, Harrogate, Chester, and other rural villages.

Analysis of the four factors

- 3.7 As set out in paragraph 2.13 above, Ofcom must have regard to four factors when considering whether to apply the Code in any person's case.

The benefit to the public of the electronic communications network by reference to which the Code is to be applied to the Applicant

- 3.8 Description of the benefits cited by Applicant:
- The Applicant began serving customers in 2019 providing gigabit-capable fibre broadband to York town centre that otherwise would be left behind in the rollout of full-fibre broadband, with the average business in the city centre being able to obtain broadband speeds of less than 10Mbps. Provision of high-speed broadband services in areas where availability is currently poor.
 - The Applicant has plans to roll out its services to other towns and cities that face similar issues as York due to heritage factors and that require specific means of installing infrastructure.
 - The Applicant's customers are, and will be, consumers and small and medium businesses located currently in York and in the future other historical areas with complex and bespoke build needs, including Bath, Harrogate, and Chester and other areas. Due to the restrictions relating to heritage-protection and with internet service providers ('ISPs') being required to adhere to strict building regulations, these areas are typically under-served when it comes to broadband capability.
 - There is also solid community engagement from the Applicant, with it offering free connectivity to charities and local organisations, such as St Leonard's Hospice, homeless shelters, and the British Heart Foundation.
- 3.9 The Applicant has stated that it intends to deploy its FTTP network in areas currently not served by such networks, typically areas served only by BT's copper access network. It considers that people and businesses would benefit from the introduction of ultrafast full-fibre broadband services.
- 3.10 We expect the deployment of new full fibre networks to improve the quality of services available and help meet the growing needs of people and businesses for connectivity. Where

providers expand their network coverage, we expect competition to fuel innovation and customer choice.

- 3.11 We recognize that there is likely to be some level of disruption during deployment process of small cells such as potential concerns over aesthetics, noise and other issues. However, we consider that the network planned by the Applicant would have the potential to benefit the people and businesses in the long run in terms of bolstering 5G's reach and availability.
- 3.12 We consider that the network planned by the Applicant would have the potential to benefit the public.

The practicability of the provision of the network and infrastructure system without the application of the Code

- 3.13 The Applicant has stated that it would not be feasible for it to deploy the proposed network without Code powers because:
- Without the ability to benefit from Permitted Development rights, the Applicant will be forced to undergo lengthy planning processes to build and grow its network.
 - UK Fibre Networks will always require access to private land to build and maintain the infrastructure needed for its intended network. Without Code Powers, UK Fibre Networks will have to pay extortionate associated costs to freeholders, should any further wayleave agreements need to be entered into. Moreover, there may be unreasonable terms proposed by any freeholders, such as unfair termination rights, if Code Powers were not granted.
 - Without Code Powers and having to continue as the Applicant currently operates, it would be at a significant disadvantage with other operators who have already been granted Code Powers. While the Applicant is the only operator to have its full-fibre network in such heritage areas, it requires the ability to maintain this status and to expand its network into such niche areas efficiently and without undue delay.
- 3.14 We consider that the business case for a broadband network is generally dependent upon the level of costs of building the network and the timely provision and take-up of services. Without the application of the Code, the Applicant's costs would likely be higher, and the time taken to then provide services, longer. We consider that, together, these effects could impair the Applicant's business case for deploying and expanding its network.
- 3.15 We consider that the network planned by the Applicant would not be practicable without the application of the Code.

The need to encourage the sharing of the use of electronic communications apparatus

- 3.16 The Applicant is willing, wherever contractually possible, to share its network with other operators and envisages that the new networks will be based on end-to-end network slicing which will enable multiple mobile and fixed line operators to share a single infrastructure.
- 3.17 UK Fibre Networks has no plans to carry out civils work for installing its apparatus in the ground, as any such cabling will be utilising the existing Openreach network via PIA.

- 3.18 Network sharing will help to minimise the unnecessary proliferation of electronic communications apparatus, bringing environmental benefits aligned with long standing Government objectives in the public interest.
- 3.19 We consider that granting the Applicant Code powers would facilitate the sharing of the apparatus.

Whether the Applicant will be able to meet liabilities as a consequence of (i) the application of the Code; and (ii) any conduct in relation to the application of the Code

- 3.20 The Applicant has provided us with information, along with its application, that confirms that it understands its obligations to provide funds for liabilities under Regulation 16¹⁹, and confirmation by a director of the company that it will ensure that sufficient funds for these liabilities are in place (and will provide Ofcom with a certificate to this effect) if, and when this becomes necessary.
- 3.21 We consider that, based on this information, the Applicant would be able to meet its liabilities.

Overall assessment

- 3.22 In addition to our consideration of the four factors discussed above in paragraph 2.13, we consider that our proposal would secure or further the performance of our statutory duties under sections 3 and 4 of the Act.
- 3.23 In particular, we consider that our proposal would encourage investment and innovation by facilitating the provision of an FTTP broadband network by the Applicant. The provision of such a network and infrastructure system would promote access to very high capacity networks and encourage the availability of a wide range of communications services, including high-speed data transfer services. In our view this would also help support the future development, growth and availability of modern communications services in the public interest.
- 3.24 This proposal will improve the quality of services available and help meeting the growing connectivity needs of people and businesses, especially in underserved and rural areas.
- 3.25 We consider that the Applicant's intended network could also enhance competition and customer choice as the Applicant proposes to offer retail services in competition with existing telecoms providers and to provide wholesale services to other telecoms providers.
- 3.26 The effect of implementing the proposal is likely to be low. Any costs to those affected by the Applicant's use of Code powers are likely to be outweighed by the benefits. On the other hand, the detrimental effect on the Applicant of a refusal to grant such powers (including to the practicability of its network roll-out) is likely to be significant.

¹⁹ Electronic Communications Code (Conditions and Restrictions) Regulations 2003 (SI 2003 No. 2553) (as amended).

- 3.27 We are also of the view that the effect of our proposal is not likely to be to the detriment of any protected group within society.

Proposal

- 3.28 Having considered the Applicant's application for Code powers, we propose that the Code should have effect in its case for the provision by the Applicant of an electronic communications network in the United Kingdom.
- 3.29 We consider that our proposal is appropriate having regard to the considerations set out in section 107(4) of the Act. We consider that the performance of our statutory duties in sections 3 and 4 of the Act would be secured and furthered in relation to this proposal.
- 3.30 We will consider any responses we may receive by the closing date before making our decision as to whether we should give a direction applying the Code to the Applicant.

The overview section in this document is a simplified high-level summary only. The proposals we are consulting on and our reasoning are set out in the full document.

A1. Responding to this consultation

How to respond

- A1.1 Ofcom would like to receive views and comments on the issues raised in this document, by 5pm on 2 June 2024
- A1.2 You can download a response form - [Proposal to apply Code powers to UK Fibre Networks \(York\) Ltd.](#) You can return this by email or post to the address provided in the response form.
- A1.3 If your response is a large file, or has supporting charts, tables or other data, please email it to ECCcodepowers@ofcom.org.uk, as an attachment in Microsoft Word format, together with the cover sheet. This email address is for this consultation only and will not be valid after 2 June 2024
- A1.4 Responses may alternatively be posted to the address below, marked with the title of the consultation:
- Electronic Communications Code Team
Ofcom
Riverside House
2A Southwark Bridge Road
London SE1 9HA
- A1.5 We welcome responses in formats other than print, for example an audio recording or a British Sign Language video. To respond in BSL:
- send us a recording of you signing your response. This should be no longer than 5 minutes. Suitable file formats are DVDs, wmv or QuickTime files; or
 - upload a video of you signing your response directly to YouTube (or another hosting site) and send us the link.
- A1.6 We will publish a transcript of any audio or video responses we receive (unless your response is confidential)
- A1.7 We do not need a paper copy of your response as well as an electronic version. We will acknowledge receipt of a response submitted to us by email.
- A1.8 You do not have to answer all the questions in the consultation if you do not have a view; a short response on just one point is fine. We also welcome joint responses.
- A1.9 It would be helpful if your response could include direct answers to the questions asked in the consultation document. The questions are listed at Annex X. It would also help if you could explain why you hold your views, and what you think the effect of Ofcom's proposals would be.
- A1.10 If you want to discuss the issues and questions raised in this consultation, please contact the ECC Team on 020 7981 3000, or by email to ECCcodepowers@ofcom.org.uk.

Confidentiality

- A1.11 Consultations are more effective if we publish the responses before the consultation period closes. This can help people and organisations with limited resources or familiarity with the issues to respond in a more informed way. So, in the interests of transparency and good regulatory practice, and because we believe it is important that everyone who is interested in an issue can see other respondents' views, we usually publish responses on the Ofcom website at regular intervals during and after the consultation period.
- A1.12 If you think your response should be kept confidential, please specify which part(s) this applies to and explain why. Please send any confidential sections as a separate annex. If you want your name, address, other contact details or job title to remain confidential, please provide them only in the cover sheet, so that we don't have to edit your response.
- A1.13 If someone asks us to keep part or all of a response confidential, we will treat this request seriously and try to respect it. But sometimes we will need to publish all responses, including those that are marked as confidential, in order to meet legal obligations.
- A1.14 To fulfil our pre-disclosure duty, we may share a copy of your response with the relevant government department before we publish it on our website.
- A1.15 Please also note that copyright and all other intellectual property in responses will be assumed to be licensed to Ofcom to use. Ofcom's intellectual property rights are explained further in our Terms of Use.

Next steps

- A1.16 Following this consultation period, Ofcom plans to publish a statement within 30 days.
- A1.17 If you wish, you can register to receive mail updates alerting you to new Ofcom publications.

Ofcom's consultation processes

- A1.18 Ofcom aims to make responding to a consultation as easy as possible. For more information, please see our consultation principles in Annex x.
- A1.19 If you have any comments or suggestions on how we manage our consultations, please email us at consult@ofcom.org.uk. We particularly welcome ideas on how Ofcom could more effectively seek the views of groups or individuals, such as small businesses and residential consumers, who are less likely to give their opinions through a formal consultation.
- A1.20 If you would like to discuss these issues, or Ofcom's consultation processes more generally, please contact the corporation secretary:
- A1.21 Corporation Secretary
Ofcom
Riverside House
2a Southwark Bridge Road
London SE1 9HA
Email: corporationsecretary@ofcom.org.uk

A2. Ofcom's consultation principles

Ofcom has seven principles that it follows for every public written consultation:

Before the consultation

A2.1 Wherever possible, we will hold informal talks with people and organisations before announcing a big consultation, to find out whether we are thinking along the right lines. If we do not have enough time to do this, we will hold an open meeting to explain our proposals, shortly after announcing the consultation.

During the consultation

A2.2 We will be clear about whom we are consulting, why, on what questions and for how long.

A2.3 We will make the consultation document as short and simple as possible, with an overview of no more than two pages. We will try to make it as easy as possible for people to give us a written response.

A2.4 We will consult for up to ten weeks, depending on the potential impact of our proposals.

A2.5 A person within Ofcom will be in charge of making sure we follow our own guidelines and aim to reach the largest possible number of people and organisations who may be interested in the outcome of our decisions. Ofcom's Consultation Champion is the main person to contact if you have views on the way we run our consultations.

A2.6 If we are not able to follow any of these seven principles, we will explain why.

After the consultation

A2.7 We think it is important that everyone who is interested in an issue can see other people's views, so we usually publish the responses on our website at regular intervals during and after the consultation period. After the consultation we will make our decisions and publish a statement explaining what we are going to do, and why, showing how respondents' views helped to shape these decisions.

A3. Consultation coversheet

Basic details

Consultation title:

To (Ofcom contact): ECC Team

Name of respondent:

Representing (self or organisation/s):

Address (if not received by email):

Confidentiality

Please tick below what part of your response you consider is confidential, giving your reasons why

- Nothing
- Name/contact details/job title
- Whole response
- Organisation
- Part of the response

If you selected 'Part of the response', please specify which parts:

If you want part of your response, your name or your organisation not to be published, can Ofcom still publish a reference to the contents of your response (including, for any confidential parts, a general summary that does not disclose the specific information or enable you to be identified)?

Yes No

Declaration

I confirm that the correspondence supplied with this cover sheet is a formal consultation response that Ofcom can publish. However, in supplying this response, I understand that Ofcom may need to publish all responses, including those which are marked as confidential, in order to meet legal obligations. If I have sent my response by email, Ofcom can disregard any standard e-mail text about not disclosing email contents and attachments.

Ofcom aims to publish responses at regular intervals during and after the consultation period. If your response is non-confidential (in whole or in part), and you would prefer us to publish your response only once the consultation has ended, please tick here.

Name

Signed (if hard copy)

A4. Consultation questions

Question: Do you have any comments on our proposal to apply Code powers to the Applicant?

A5. Statutory notification

Notification under section 107(6) of the Communications Act 2003

Proposal to give a direction applying the electronic communications code

Proposal in this Notification

1. Ofcom hereby proposes, in accordance with section 107(6) of the Act, to give a direction under section 106(3) of the Act applying the Code to the Applicant.
2. The proposed direction applying the Code to the Applicant on the terms proposed is set out in the Schedule to this Notification.
3. Ofcom's reasons for giving the proposed direction are set out in the accompanying consultation document.

Ofcom's duties

4. In making this proposal, Ofcom has had regard, in particular, to each of the matters set out in section 107(4) of the Act. Furthermore, Ofcom has considered and acted in accordance with its general duties in section 3 of the Act and the six requirements in section 4 of the Act.

Making representations

5. Representations on this proposal may be made by email to ECCcodepowers@ofcom.org.uk, by no later than 5pm on 2 June 2024.

Interpretation

6. In this Notification—
 - (a) “**Act**” means the Communications Act 2003;
 - (b) “**Applicant**” means UK FIBRE NETWORKS (YORK) LTD, whose registered company number is 11590146;
 - (c) “**Code**” means the electronic communications code set out in Schedule 3A to the Communications Act 2003; and
 - (d) “**Ofcom**” means the Office of Communications.
7. For the purpose of interpreting this Notification—
 - (a) headings and titles shall be disregarded; and
 - (b) the Interpretation Act 1978 shall apply as if this Notification were an Act of Parliament.
8. The attached Schedule forms part of this Notification.

23 April 2024

SCHEDULE

[Proposed] Direction under section 106(3) of the Communications Act 2003 applying the electronic communications code

Background

1. UK FIBRE NETWORKS (YORK) LTD, whose registered company number is 11590146, has applied to Ofcom for a direction applying the Code to it.
2. The date on which Ofcom received a completed application that meets the statutory requirements with respect to the content of an application for a direction applying the Code and the manner in which such an application is to be made was 4 OCTOBER 2023.
3. By virtue of regulation 3 of the Electronic Communications and Wireless Telegraphy Regulations 2011 (SI 2011 No. 1210), except in cases of expropriation, Ofcom must make its decision within 6 months of receiving the completed application.
4. Prior to giving a decision under section 106(3) of the Act to apply the Code to UK FIBRE NETWORKS (YORK) LTD, Ofcom must publish a notification of its proposal to give the direction and consider any representations about that proposal that are made to Ofcom within the period specified in the notification.
5. On 2 May, Ofcom published a notification in accordance with section 107(6) of the Act of its proposal to give a direction applying the Code to UK FIBRE NETWORKS (YORK) LTD. That notification invited representations to Ofcom by no later than 5pm on 2 June 2024.
6. *[Ofcom has considered every representation about the proposal made to it/Ofcom did not receive any representations about the proposal]*. For the reasons set out in the explanatory statement accompanying Ofcom's consultation, Ofcom has had regard, in particular, to each of the matters set out in section 107(4) of the Act. Furthermore, Ofcom has considered and acted in accordance with its general duties in section 3 of the Act and the six requirements in section 4 of the Act.

Decision

7. Ofcom hereby directs, in accordance with section 106 of the Act, as follows—
 - (a) the Code shall apply to UK FIBRE NETWORKS (YORK) LTD (whose registered company number is 11590146 for the purposes of the provision by it of:
 - i. an electronic communications network; and
 - (b) that application of the Code shall have effect throughout the United Kingdom.
8. This Direction shall take effect on the day it is published.

Interpretation

9. In this Direction—
 - (a) “**Act**” means the Communications Act 2003;
 - (b) “**Code**” means the electronic communications code set out in Schedule 3A to the Communications Act 2003;
 - (c) “**Ofcom**” means the Office of Communications.
10. For the purpose of interpreting this Direction—
 - (a) headings and titles shall be disregarded;

- (b) the Interpretation Act 1978 shall apply as if this Notification were an Act of Parliament.
