

YES

Chorley FM is a superb example of what a local community radio station ought to be. Chorley FM should be allowed to produce content, and to work in a way, that supports the needs of the local community as a whole. As the owner of a Chorley business and as a Chorley resident, I recognise and value the community support, education and entertainment, that Chorley FM provides to the local community. I fully support the changes to the station's key commitments as proposed by Chorley FM. The proposed changes will allow the station to continue the excellent work that it does and to support and produce content for all sectors of the local community. To deny the proposed changes would seriously jeopardise the ability of the station to continue the valuable work that it does, in addition to effectively undermining the ability of the station to attract commercial sponsors, thereby putting the entire future of the station at risk.
