

**What do you want Ofcom to keep confidential?:**

Keep name confidential

**If you want part of your response kept confidential, which parts?:**

I'm not comfortable with DRM on the HD signal, because it means the BBC can dictate which tv's and other devices I can watch the content on. Currently I record TV onto an Apple Mac and watch it on my ipod/iphone later in the week while I commute to and from work.

The BBC can tell me that the device I currently use is no longer acceptable I won't be able to view this content anymore..

As I travel on the Underground, I'm not able to use streaming catchup services.

With DRM the BBC would effectively be controlling the market on electronics and limiting consumer choice on devices. Which is completely outside of their remit in my opinion.

**Ofcom may publish a response summary:**

Yes

**I confirm that I have read the declaration:**

Yes

**Ofcom should only publish this response after the consultation has ended:**

Yes

**Additional comments:**

**Question 1: Do you agree that copy management would broaden the range of HD content available on DTT and help secure its long term viability as a platform? :**

No, because people wouldn't be able to get easy access to watch this content where and when they want, they'd be limited to very few methods of watching the content.

**Question 2: Do you agree that the BBC's proposed multiplex licence amendment represents the most appropriate means for securing an effective content management system on HD DTT? :**

No

**Question 3: Do you agree with the proposed change to Condition 6 in the Multiplex B Licence? :**

**Question 4: Do you agree that Multiplexes C and D should be granted a similar amendment to their Licences as Multiplex B?. :**

**Question 5: Do you agree that the BBC?s proposed approach for implementing content management would safeguard citizens and consumers legitimate use of HD content, and if not, what additional guarantees would be appropriate? :**

**Question 6: Do you agree that the BBC?s proposed choice of content management technologies will have only a negligible impact on the cost of HD DTT receivers and their interoperability with other HD consumer equipment? . :**

In the UK we would most likely be limited the choice of consumer electronics we could use compared to other countries, this would probably increase the price of these electronics too.

**Question 7: Do stakeholders agree that the BBC?s proposed Huffman Code licensing arrangements would have a negligible effect on the market for HD DTT receivers? :**

**Question 8: Do the BBC?s proposed content management states and their permitted use for different categories of HD content meet the requirements of other HD broadcasters on DTT? . :**

**Question 9: Are there any issues that you consider Ofcom should take into account in assessing the BBC?s proposal, that have not been addressed by this consultation?:**
