

Title:

Mr

Forename:

Roger

Surname:

Baines

Representing:

Self

Ofcom may publish a response summary:

Yes

Additional comments:

I think that any equipment which is tested should be done in the locations used not a LAB test. A real world test.

Question 1: Do you agree that the Proposed Regulations correctly give effect to the policy proposals referred to, and to the other intentions set out, in this document?:

We have some remaining concerns:

Apparatus measured as compliant, may not meet the essential requirements when connected to a system where unbalanced supply and interconnecting cables may act as antenna with gain. We would like to see stronger powers for enforcement against complete systems which cause undue interference.

Challenges will remain to prove undue interference. Provision of adequate resources to take field measurements and prove non-compliance with standards or undue interference will remain an issue.
