# 1. Overview

**On 2 May 2024 there will be: local (and mayoral)<sup>1</sup> elections taking place in some parts of England; London Assembly and Mayoral elections; and elections for Police and Crime Commissioners for England and Wales.** To help broadcasters to take editorial decisions during election campaigns, we are publishing a digest of evidence of past electoral support (i.e. election results) and evidence of current support (in the form of opinion polls). This digest also sets out the factors we consider when making decisions on election-related programming, including putting more weight on evidence of past electoral support than evidence of current support (e.g. opinion polls).

## What we are including in this document

**This document is an updated version of the digests of evidence of past electoral support and current support we have published ahead of the various elections since May 2017.**

This digest provides a range of information to assist broadcasters when they are making: editorial decisions about election coverage during the election period<sup>2</sup> under [Section Six](#) of the Broadcasting Code ('the Code'); and decisions about the allocation of party election broadcasts (PEBs) under Ofcom's rules on Party Political and Referendum Broadcasts ('[the PPRB Rules](#)'). However, this digest is not intended to be an exhaustive compendium of all currently relevant electoral evidence. Broadcasters should also take account of other relevant information when making decisions in relation to their coverage of elections. For example, broadcasters should take account of relevant past electoral support and/or current support for parties and candidates in particular constituencies and electoral areas, when making editorial decisions in relation to coverage of electoral contests in those areas.

- 1.1 Since 9 March 2017<sup>3</sup>, Ofcom has required broadcasters to take election-related editorial decisions and decisions about allocations of PEBs and party political broadcasts (PPBs) by reference to evidence of past electoral support and/or current support. As an aid to broadcasters, we have published digests of evidence of past electoral support (i.e. election results) and evidence of current support (in the form of opinion polls) ahead of the various elections that took place in the UK since 9 March 2017.
- 1.2 We consider it would be helpful to set out some of the factors Ofcom takes into account in weighing different types of evidence when taking decisions around the enforcement of

---

<sup>1</sup> This includes nine combined authority mayoral elections in: East Midlands; Greater Manchester; Liverpool City Region; North East; South Yorkshire; Tees Valley; West Midlands; West Yorkshire; and York and North Yorkshire. There is also a single authority mayoral election in Salford.

<sup>2</sup> In relation to the various elections taking place on 2 May 2024, the rules in Section Six of Ofcom's Broadcasting Code will apply when the 'election period' commences. The start date of the election periods in England and Wales will be confirmed in a Note to Broadcasters, to be published in March 2024 in Ofcom's Broadcast and On Demand Bulletin.

<sup>3</sup> On this date, Ofcom published its Statement amending its rules in the areas of due impartiality, due accuracy, elections and referendums ('the Statement'). In the Statement, we set out our decision to remove the concept of larger parties from Section Six of the Code and the PPRB Rules and to replace it with a requirement on broadcasters to take election-related editorial decisions and decisions about allocations of PEBs and party political broadcasts (PPBs) by reference to evidence of past electoral support and/or current support.

Section Six of our Code in the area of elections. These factors, set out below, reflect the approach we have taken to complaints since March 2017:

- we place greater weight on the actual performance of a political party or an independent candidate in elections over opinion poll data. This reflects the fact that electoral performance is a measure of how voters have actually exercised their democratic choice. This compares with the greater uncertainty associated with support in opinion polls, which may not translate into actual votes or seats at an election;
- in considering past electoral support, we take into account factors such as the electoral performance of parties (including the numbers of elected candidates and overall percentage of vote received) or independent candidates in the previous set of corresponding elections over at least two electoral cycles;
- we also take into account performance in other relevant past elections being contested at the same time, as well as performance in other recent past elections;
- we take into account the electoral performance of parties or independent candidates over at least two electoral cycles when considering performance in any given type of elections. However, we place less weight on the evidence of electoral performance two or more electoral cycles ago given the historical nature of this evidence;
- where relevant, we consider evidence in relation to electoral performance in the different nations of the UK;
- while putting less weight on levels of current support as opposed to actual performance, we put weight on evidence of current support that is objective and measurable. One type of objective and measurable evidence of current support is opinion poll data, where it is available. There may be other types of evidence of current support but in considering such evidence we would take into account the consistency and objectivity of each type of evidence; and
- our intention is always to undertake a balanced assessment having regard to the totality of relevant evidence.

1.3 For further information regarding evidence of past electoral support and current support, please see our [Guidance to Section Six](#) of the Code, paragraphs 1.42 to 1.47.

1.4 In Section Two we lay out evidence of past electoral support in the form of past election results, which includes the performance, over two election cycles, of political parties across the nations of the UK in: English local and, where relevant, mayoral elections; London Assembly and Mayoral elections; Police and Crime Commissioner elections in England and Wales; and other significant elections which are not being contested on 2 May 2024.

1.5 In the event that a UK General Election is called later in 2024<sup>4</sup>, Ofcom will publish a further Election Digest. However, should other elections occur before then, e.g. by-elections, it is

---

<sup>4</sup> Under the provisions of the Dissolution and Calling of Parliament Act 2022, the current UK Parliament would dissolve on 17 December 2024, unless dissolved earlier.

open to broadcasters to make reference to this digest in helping to frame their decisions. It might also be necessary in such circumstances for broadcasters to assess any more recent evidence that may be relevant.

- 1.6 In Section Three we lay out evidence of current support for the political parties across England, Wales, Scotland and Northern Ireland in the form of opinion polling data since the various elections which took place on 4 and 18 May 2023.

## Guidance on the PPRB Rules on scheduling

---

- 1.7 Rules 25 and 26 of our PPRB Rules set out the scheduling requirements for PEBs and PPBs<sup>5</sup>. We expect broadcasters to make scheduling decisions in a fair and consistent manner having regard to evidence of past electoral and current support. We will therefore expect broadcasters to continue to allocate PEBs and PPBs to parties with higher levels of past electoral and current support at times which are likely to attract higher rather than lower numbers of viewers and listeners. We will also expect broadcasters to ensure that different parties are allocated PEBs and PPBs at different times in the schedule, in order to ensure the various parties' messages reach the widest possible audience. In particular, if a broadcaster consistently allocated PEBs and/or PPBs to a particular party at times attracting the lowest audiences, we would view this as potentially raising issues regarding the preservation of due impartiality under Section Five and/or (when during an election period) Section Six of the Code.

---

<sup>5</sup> Rule 25 states: "PEBs, PPBs and RCBs on television must be carried between 5.30pm and 11.30pm". Rule 26 states: "PEBs and RCBs on radio must be carried between 6.00am and 10.00pm".

## 2. Evidence of past electoral support

### Previous results of elections being contested in May 2024

#### English local elections

2.1 Figure 1 sets out figures collated by the Elections Centre, Plymouth University of the numbers of seats won and share of the popular vote achieved by the various political parties for English local elections in recent years, including: the past two cycles of English local elections in terms of sequential years (2022 and 2023); and the last two elections where the seats being contested in May 2024 were last contested (2016 and 2021).

**Figure 1: Numbers of seats and share of vote at English local elections 2016 to 2023**

#### English mayoral elections

2.2 Mayoral elections are due to take place in May 2024 in England for: East Midlands; Greater Manchester; Liverpool City Region; London; North East; Salford; South Yorkshire; Tees Valley; West Midlands; West Yorkshire; and York and North Yorkshire.

2.3 Figure 2 sets out the winning party and the share of the first preference vote achieved by the various political parties in the past two cycles of the mayoral elections being contested, where available. The mayoralty of West Yorkshire was created in 2021, therefore only one prior set of results is available for this authority. The mayoralities of East Midlands and York

<sup>6</sup> The Brexit Party was formed in November 2018 and changed its name to Reform UK in January 2021.

and North Yorkshire are new positions, therefore there are no prior results for these authorities. The mayoralty of North East is a new role which will replace the current North of Tyne Combined Authority Mayoralty. Previous election results for the mayoralty of North of Tyne are therefore provided. See Figure 3 for prior results of London Mayoral elections.

**Figure 2: Number of mayoralties and share of vote at mayoral elections in the past two cycles**

# 3. Evidence of current support

We lay out below evidence of current support, as indicated by opinion polls, in England, Wales, Scotland, Northern Ireland and London.

## England

- 3.1 Great Britain-wide polls can be used as a proxy for gauging levels of current support in England only. One source of aggregated Great Britain-wide opinion poll figures is the Polling Observatory project.
- 3.2 The Polling Observatory project has produced estimates of current support by pooling all the available evidence to reduce the impact of the random variation that each individual survey inevitably produces.
- 3.3 Figure 16 set outs the Polling Observatory data from the various elections in May 2023 to the end of January 2024. These figures are calculated on the basis of a rolling average of all polls over a two-month window, unadjusted for ‘house effects’ i.e. estimated biases of the individual pollsters.

Figure 16: Polling Observatory opinion poll data (Great Britain-wide) May 2023 – January 2024

Date (Week beginning)	Cons	Lab	Lib Dem	Green	Reform
04/05/2023	27.7%	44.1%	10.5%	5.3%	5.6%
