

Ms Sara Winters,

I am writing to you to inform Ofcom that I believe that the future of AD lies in Option 2 (increase to 20% for all channels required). I believe this, as I am visually impaired and benefit from AD, as it allows me to enjoy programmes which I would otherwise be unable to follow. Especially programmes such as "Doctor Who" and "Wallace and Gromit", which move at such a fast pace, that I would otherwise be unable to follow. I feel that AD is very important, and would be of great benefit to many more people if the minimum rate was increased to 20%.
