

Telecoms and Pay
TV Complaints
Q2 (April to June) 2016

Publication date: 28 September 2016

About this document

This document presents data for complaints recorded by Ofcom against the largest telecoms and pay TV providers in the quarter April 2016 to June 2016. This is Ofcom's twenty-second quarterly report.

This document is intended to help consumers make better informed decisions, especially those who are thinking about changing provider or purchasing a new service. We also believe that publication of provider-specific complaint volumes incentivises providers to improve their performance.

The next publication will include data for the period July to September 2016, and we expect to publish it in December 2016.

Section 1

Executive summary

- 1.1 Ofcom's principal duty is to further the interests of citizens and consumers, where appropriate by promoting competition. In doing so we must have regard to the interests of consumers in terms of price, quality of service and value for money. Consumer information plays a critical role in promoting effective competition and the absence of key information can lead to poor purchasing decisions and inhibit switching.
- 1.2 On average, Ofcom receives nearly 300 calls a day from consumers.¹ Consumers also contact us by post and via our website. Many of these contacts result in complaints, and some contain more than one complaint.² These complaints are likely to be made where a consumer has been unable to resolve an issue with their provider to their satisfaction. We record these complaints by service, e.g. broadband, and by provider. We believe that this information is useful for consumers; for example, this data may be relevant to those considering a new service or change of provider. We note that provider-specific information is also available to guide consumers in areas such as financial services.
- 1.3 We have previously published data for each quarter between October 2010 and March 2016.^{3,4} This publication provides data for the quarter April 2016 to June 2016.
- 1.4 When considering the information in this report, readers should note a number of important limitations that apply to the complaints information we publish. In particular:
 - The data only covers complaints that consumers have chosen to report to Ofcom, and does not represent complaints consumers may have made directly to their providers or to other agencies (e.g. Alternative Dispute Resolution schemes). As such it only provides a partial picture of complaints relating to any provider.
 - The complaints data is calculated using subscriber figures provided by the operators in question, and when comparing operators' performance, it is important to note that there are some differences in the methodologies operators use to compile them.⁵ The complaints data reflect the views of consumers as reported to Ofcom and the way we record them. Ofcom has sought to ensure that its data are sound but has not checked the veracity of individual complaints.

¹ Ofcom received around 70,000 calls from consumers each year (*source*: Ofcom 2015/16 Annual Report, page 41: http://www.ofcom.org.uk/content/about/annual-reports-plans/annual-reports/annual-report-15-16/Ofcom_Annual_Report_2015-2016.pdf)

² Where a consumer complains about a single matter, we record that as a single complaint. If they complain about two or more separate things, we record that as two complaints (where they complain about more than two matters, we record the two most serious ones).

³ Previous editions can be found at: <http://stakeholders.ofcom.org.uk/market-data-research/telecoms-research/complaints/?a=0>

⁴ As a result of a number of checks, pay monthly mobile data is no longer presented in any publication prior to Q1 2014 (where it was restated); pay TV complaints were first published from October 2011 (i.e. from Q4 2011).

⁵ Ofcom has carried out checks on the data in the report to ensure that it is accurate enough to be of use to those seeking to compare providers. In instances where there is little difference between operator complaint levels, we do not distinguish between their performances.

- Contact with Ofcom may reflect the relative (lack of) quality of complaints handling services, as well as the quality of service received. Given this, companies with poor complaints handling processes may feature more prominently than those with good complaints handling processes.
 - Ofcom may see spikes in call volumes from customers of certain providers when we publicise certain types of enforcement action (e.g. investigations, fines).
 - Bigger performance fluctuations are likely for smaller operators compared to larger operators because of the smaller numbers of subscribers against which complaints are measured for these operators. This should be taken into account when observing shorter term movements in the data.
- 1.5 The charts in this report only include complaints data from providers who met the criteria implemented up to (and including) Q1 2014,⁶ and, from Q2 2014 onwards, those who meet the current criterion of having a market share of 1.5% or above.⁷
- 1.6 As providers vary in size, we publish complaints as a proportion of residential subscribers.⁸ Presenting the complaint numbers in this manner ensures that meaningful comparisons can be made between the data for each provider.
- 1.7 The main findings for the reporting period covering April 2016 to June 2016 (Q2 2016) are as follows:⁹
- Overall complaints: The total volume of complaints fell from Q1 2016 except for the pay TV sector, where complaint levels remained stable. Broadband and fixed line services continue to generate the highest number of complaints, and Ofcom continues to receive the fewest complaints about PAYG mobile services and pay TV compared to other services included in this report.
 - Fixed line telephony: The providers covered here are BT, EE, Plusnet, Post Office HomePhone, Sky, TalkTalk Group and Virgin Media. TalkTalk and Plusnet generated the highest volume of complaints per 100,000 subscribers in Q2 2016. TalkTalk's main complaint drivers were issues with billing, pricing and charges; fault, service,¹⁰ and provision; and complaint handling. Plusnet's main complaint drivers related to issues around faults, service and provision; issues relating to billing, pricing and charges; and complaints handling. Post Office HomePhone, EE and BT also generated relative complaint volumes above the industry average. Sky received the least complaints per 100,000 subscribers compared to the other fixed line providers in the report.
 - Fixed broadband: The providers covered here are BT, EE, Plusnet, Sky, TalkTalk Group and Virgin Media. BT and Plusnet generated the highest relative complaint volumes in Q2 2016. BT's main complaint drivers related to faults, service and

⁶ Up until Q1 2014, providers were generally included in the report if they had a relevant market share of 4% and regularly generated more than 30 complaints per month. See our Q2 2014 report for information on these changes.

⁷ Which reflects the criteria for inclusion Ofcom will generally apply, unless there are exceptional circumstances warranting a different approach.

⁸ Complaints are displayed per 100,000 customers. This enables the providers to be compared on a like-for-like basis.

⁹ Due to PAYG complaint ratios not providing meaningful comparisons, we do not provide commentary on this sector.

¹⁰ Service in this context relates to issues with the communications service being provided e.g. coverage issues, broadband speeds, restriction of service by provider etc.

provision issues; issues with billing, pricing, and charges; and complaint handling. Plusnet's main complaint drivers related to faults, service and provision issues; complaints handling; and issues with billing, pricing and charges. EE and TalkTalk also generated above industry average relative complaint levels. Sky generated the lowest relative complaint volumes compared to the other fixed broadband providers that we report on.

- Mobile pay-monthly telephony (excluding mobile broadband datacards and dongles): The providers covered here are EE, O2, Talk Mobile, Tesco Mobile, Three, Virgin Mobile and Vodafone. Vodafone had the highest relative volume of complaints this quarter, and these mainly related to issues about billing, pricing and charges; complaints handling; and fault, service and provision issues. Talk Mobile complaint levels were in line with the industry average. All other providers reported on generated relative complaint levels that were below the industry average, with Tesco Mobile generating the lowest relative volume of complaints compared to the other published providers.
- Pay TV services: The providers covered here are BT, TalkTalk, Sky and Virgin Media. BT generated the highest relative volume of complaints in Q2 2016. The main drivers of BT's complaints related to issues around billing, pricing and charges; issues around fault, service, or provision; and complaints handling. TalkTalk and Virgin also generated relative complaint volumes above the industry average, while Sky received the lowest volume of complaints per 100,000 subscribers.

Section 2

Introduction

Background

- 2.1 Consumers' overall level of satisfaction with communications services is around 90%.¹¹ Where concerns arise, consumers typically raise their complaint with their provider in the first instance.¹² If the provider is not able to resolve the complaint within eight weeks, or if deadlock is reached earlier, the consumer can make an application to an independent Alternative Dispute Resolution (ADR) scheme. The ADR scheme can examine the complaint and make a judgement on the issue.¹³
- 2.2 In addition, some consumers choose to contact Ofcom due to our role as regulator of communications services. While we do not resolve individual complaints ourselves, we offer consumers advice on how they might best seek to resolve the issues that are raised. We also use the complaints data to inform policy, enforcement and monitoring work.¹⁴ On average, we receive nearly 300 consumer calls a day, plus contacts via email and letter, each of which may involve one or more complaints.¹⁵

Why publish provider-specific complaints?

- 2.3 Since April 2011 we have published quarterly Ofcom complaints data by provider. Complementary to this report, we have also, since 2009, regularly published research on 'customer service satisfaction' on a provider-specific basis. The latest research report was published in January 2016.¹⁶
- 2.4 The publication of performance data like this is consistent with our statutory duty relating to transparency and our obligations as a public authority. Moreover, it is in line with our principal duty to further the interests of citizens and consumers, where appropriate by promoting competition. Consumer information plays a critical role in ensuring that competitive communications markets work for consumers. The absence of information can lead to poor purchasing decisions. Therefore, if information is not readily available or is unclear, there may be a case for Ofcom to intervene in the interests of consumers. Under section 26 of the Communications Act 2003, we have a duty to arrange for the publication of such information and advice as appears to us to be appropriate to make available to consumers.¹⁷

¹¹ Ofcom, *The Communications Market 2015 (August)*, page 35

http://stakeholders.ofcom.org.uk/binaries/research/cmrcmr15/CMR_UK_2015.pdf

¹² This has been found in research, including, for example, that carried out for the 2008 Consumer Complaints Review available at

http://stakeholders.ofcom.org.uk/binaries/consultations/alt_dis_res/research.pdf

¹³ Ofcom requires all CPs to be a member of an approved ADR scheme. Ofcom carried out a Review of Consumer Complaints Procedures - the statement is available at

<http://stakeholders.ofcom.org.uk/consultations/adr-review-12/statement>

¹⁴ Information on any investigation we launch as a result of complaints to Ofcom can be found in the enforcement bulletin <http://stakeholders.ofcom.org.uk/enforcement/competition-bulletins/>

¹⁵ See footnotes 1 and 2.

¹⁶ http://stakeholders.ofcom.org.uk/binaries/research/quality-of-customer-service-annual-reports/Quality_of_Customer_Service_report_2015.pdf

¹⁷ Having regard to the need to exclude confidential information from publication. For the reasons set out here, Ofcom considers that, having had that regard, publication of the information in this report is appropriate.

- 2.5 We recognise that there is no single source of information that can give consumers a full picture of the relative performance of different providers. In addition, different service features will matter more for some consumers than for others. Ofcom research suggests that, for many consumers, comparative price and network performance information is of primary importance. In light of this, we have ensured that consumers have improved information available in these areas. Examples include publication of broadband speeds research,¹⁸ mobile coverage maps,¹⁹ and our scheme for accrediting price comparison calculators.²⁰
- 2.6 In addition, the publication of provider-specific complaints data may act as an incentive for providers to improve their performance.²¹ Similar information is also available to guide consumers in a number of other sectors, including, for example, financial services.²²
- 2.7 We believe that our complaints data, along with other information,²³ can be useful for consumers seeking to compare providers.²⁴ We also observe that the data is of interest to intermediaries such as consumer groups, journalists and price comparison services who advise consumers.
- 2.8 This transparent approach is consistent with the current Government's view that the publication of complaints data "will encourage businesses to improve their performance and help customers to make informed choices about the products and services they buy".²⁵
- 2.9 Taking the above taken into consideration, we consider that the objectives of publishing this report are to:
- further the interests of citizens and consumers by providing them with information that will help them facilitate and take advantage of a competitive market;
 - ensure transparency of data; and
 - incentivise improved provider performance.
- 2.10 This is the twenty-second report to include Ofcom telecoms complaints data by provider, and the eighteenth to include complaints data about pay TV services. The methodology used here is set out in Section 3.

Section 3

Methodology

Introduction

- 3.1 Consumers, both residential and business, can contact Ofcom with complaints or enquiries over the phone, by letter or through one of the dedicated complaint submission forms on our website.²⁶ All complaints²⁷ are logged in the same database by Ofcom's Consumer Contact Team (CCT), providing a record of the total complaints that Ofcom has received, as well as details on the services affected and the providers of those services.
- 3.2 In this section we outline the approach we take to the publication of our complaints data.

Scope of the data published

- 3.3 We collect complaints data across a wide range of services - broadcasting, spectrum, telecoms and post.²⁸
- 3.4 The focus of this publication is complaints made by residential²⁹ consumers in relation to fixed line telephony, fixed broadband, mobile telephony and pay TV.
- 3.5 Consumers complain to Ofcom about a wide range of issues³⁰ so we have considered carefully the way we record complaints and what level of data would be useful and robust enough for publication. In any particular call to Ofcom, or other contact with us, a consumer may complain about one or more separate matters. If they complain about a single matter, we record that as a single complaint in the relevant complaint category. If they complain about two or more separate matters, we record that as two complaints in two separate categories.³¹ In view of the complexity of some of the data, our current position is that we should only publish complaints data by service rather than by detailed category of complaint for each service.
- 3.6 The four services³² covered in this publication are:

²⁶ Refer to: <http://consumers.ofcom.org.uk/tell-us/telecoms/>

²⁷ A complaint is an expression of dissatisfaction made by a customer related to the communications provider's services, or to the complaint-handling process itself. Where the complaint is made to Ofcom over the phone, the consumer is asked whether their call is about an enquiry or complaint.

²⁸ We publish complaints about the content of programmes broadcast on television by provider in our Broadcasting Bulletins. Spectrum complaints cannot be reported in more detail as the majority of complaints are about interference and as such are not provider specific.

²⁹ Ofcom records business and residential telecoms complaints separately, based on how the individual identifies themselves when reporting the complaint.

³⁰ We currently record over 159 different categories of telecoms complaints.

³¹ For example, if a consumer contacts us about inaccurate billing and poor customer service in the way the provider handled the consumer's complaint, we record that as two complaints. If they complain about more than two separate matters, we record that as two complaints (about the two most serious matters complained of).

³² As detailed in our Q2 2014 publication, we have determined that the current complaint ratios for PAYG mobile services are so small that they are unable to provide meaningful comparisons. As a result, we no longer provide basic commentary on this sector, but will continue to monitor it closely.

- Fixed line telephony - includes complaints against companies that offer both line rental and calls as well as those that supply calls only services;
- Fixed broadband - includes copper based ADSL services, cable services and fibre services;
- Pay-monthly mobile services;³³ and
- Pay TV - includes complaints relating to access to the service but does not include the content delivered over the pay TV service. This category includes services provided through cable, satellite, digital terrestrial television or over a dedicated broadband connection.

Complaints about bundled services

- 3.7 Many consumers choose to purchase a bundle of services from one provider (for example, fixed line telephony with a fixed broadband service). Any issues that subsequently arise may affect one or more of those services and this influences how a complaint may be recorded by us.
- 3.8 The approach we take when recording complaints received from consumers who take a bundle of services from a provider is as follows:
- If the complaint only relates to one of the services in the bundle, the complaint is recorded against that single service only. For example, if a consumer has fixed line telephony and fixed broadband as part of a bundle and complains about slow broadband speeds, the complaint would be logged against the broadband service only as it is this aspect of the service that is causing the problem.
 - If the complaint is about an issue that affects a number of services in a bundle, the complaint is recorded against each affected service for that provider. For example, if a consumer complains about being mis-sold a triple play service, the complaint will be counted as a fixed telephony, fixed broadband and as a pay TV complaint for that provider.
- 3.9 This approach enables us to have a record of all complaints received by provider and by service. Also, as we are publishing total complaints by provider for each service, but not across the services in aggregate, the complaints are not double counted.

Complaints about transfers to unknown providers

- 3.10 If a consumer is unexpectedly told by their existing provider that a request has been made to transfer their service to another provider, they may complain to Ofcom without knowing the name of the new provider.³⁴ In these circumstances Ofcom refers the case to Openreach to find out recent activity on the line, including applications to transfer and completed transfers. If a request for a transfer has been made by another provider, the complaint is recorded against that other provider. If no request for a transfer has been made, then the complaint is recorded against the existing provider.

³³ Mobile pay monthly services will include complaints about use of data through a mobile handset but do not include dongles or datacards.

³⁴ Their existing provider may not have visibility of the new provider either, and may only be aware that a request has been made to take over the service.

Focus on the largest providers

- 3.11 Ofcom records complaints received against any provider in the UK. The size of each individual provider varies greatly, as does the number of complaints received. As a result, to ensure that this report covers as many providers as reasonably practicable, we adopt a criterion to help us decide which providers are included in the report.
- 3.12 Specifically, following a review,³⁵ from Q2 2014 onwards this report now generally includes complaints data³⁶ for those providers which, for the service being reported, have a market share of 1.5% or more in the relevant market.
- 3.13 For providers included in the reporting for periods before Q2 2014, we have not retrospectively adjusted the previous generally applied publication criteria for inclusion (i.e. having a 4% market share and regular generation of at least 30 complaints per month). Therefore, the previous criteria still apply to those reports. In addition, a provider will generally³⁷ be removed from the report if, from Q2 2014 onward, its market share has dropped below 1.5% for four consecutive quarters.
- 3.14 This encompasses the providers set out in Table 1 below. Together, these providers account for over 90% of each market covered.³⁸

³⁵ See our Q2 2014 report for further detail.

³⁶ In the absence of exceptional circumstances, in which, should they apply, we may take a different approach.

³⁷ In the absence of exceptional circumstances.

³⁸ At least 94% of market for fixed lines, 97% for fixed broadband, 99% for pay monthly mobile telephony and 90% for pay TV.

3.15 Table 1: Providers included in this publication

Fixed Line Telephony	BT
	EE
	Plusnet
	Post Office HomePhone
	Sky
	TalkTalk Group
	Virgin Media
Fixed Broadband	BT
	EE
	Plusnet
	Sky

	Mobile Pay Monthly
O2	
Talk Mobile	
Tesco Mobile	
Three	
Virgin Mobile	
Vodafone	
Pay TV	
	Sky
	TalkTalk
	Virgin Media

³⁹ This includes Orange, T-Mobile and 4GEE.

Aggregating data

- 3.16 For pay monthly mobile we present data for Orange, T-Mobile and 4GEE in an aggregated form. The charts below refer to this data as “EE”.

Complaints as a proportion of subscribers

- 3.17 Other things being equal, the more subscribers a provider has the more complaints are likely to be made. Given the variation in size of provider, we publish complaints as a proportion of the relevant subscriber base to put complaints numbers into context and to help ensure the data is more meaningful for consumers.
- 3.18 To achieve this, we use the number of connections⁴⁰ provided to Ofcom by the operators in question. We do not collect these data for pay TV providers and so, to calculate pay TV complaints per one-hundred thousand customers, we use customer data from the providers own published investor reports. All of the pay TV providers that we report on publish subscription data on a regular basis as part of their updates to investors.
- 3.19 We understand from providers that quarterly connection data are more robust than monthly data⁴¹ and therefore we use quarterly data to calculate the complaints data.
- 3.20 While the subscriber figures provided to Ofcom are the most accurate ones available to each provider, there are some differences in the methodologies which have been used to compile them. These differences mean that there may be instances where one provider has reported a customer as being a residential user when another would not have. Ofcom has carried out checks on the data in the report to ensure that it is accurate enough to be of use to those seeking to compare providers. In instances where there is little difference between operator complaint levels, we do not distinguish between their performances in our analysis.
- 3.21 For reference, fixed line telephony can be provided as a combined calls and line rental service or as a calls only service. As both services can generate fixed line complaints, Ofcom considers it is appropriate for them both to be included in the customer base used here.

The industry average line

- 3.22 As an additional data point against which to measure the performance of each provider, we include an industry average line. This shows the average number of complaints per 100,000 subscribers across all the providers included in the published data for each service. It does not include smaller providers who generally have a market share lower than 1.5%.

⁴⁰ Note that it is possible for an individual to have more than one connection.

⁴¹ Particularly where the quarterly data is reported externally.

Section 4

Telecoms and Pay TV Complaints

Introduction

- 4.1 This section sets out our complaints data from Q3 (July – September) 2014 to Q2 (April – June) 2016.
- 4.2 The data is presented on a quarterly basis (Q3 2014 to Q2 2016). The charts in this publication present complaints data for these quarters.⁴² The next publication will contain data for Q3 2016 (July to September) to be published in December 2016.
- 4.3 The charts only include complaints data about providers who met the criteria generally implemented up to (and including) Q1 2014,⁴³ and, from Q2 2014 onwards, those who meet the current generally applied criterion of having a market share of 1.5% or more in the relevant market.

Relative complaints by service sector

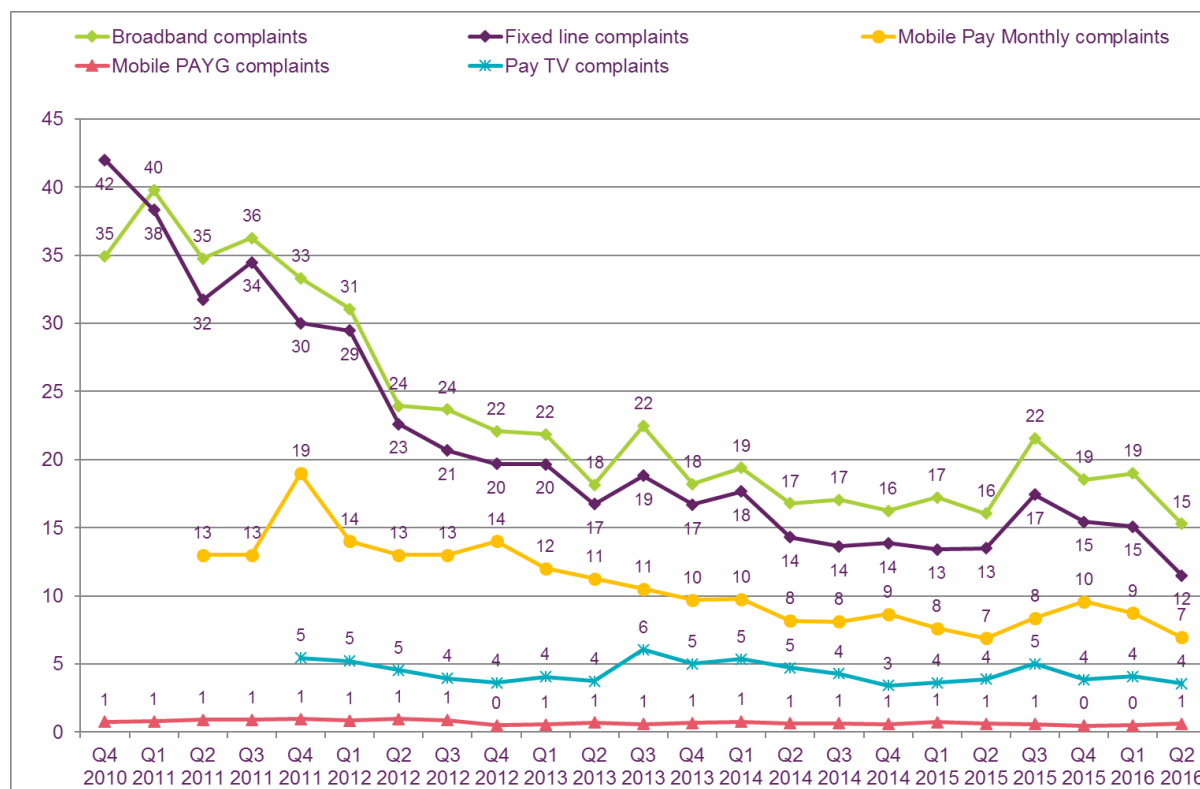

- 4.4 The following figures show the residential consumer complaints that Ofcom received across fixed line, broadband, pay monthly mobile and pay TV services between Q3 (July - September) 2014 and Q2 (April – June) 2016 inclusive.⁴⁴ For each sector we also present a table noting performance over the most recent quarter only. The information is presented per 100,000 customers/connections for the period covered.
- 4.5 Figure 1 shows that broadband and fixed line services generate the highest number of complaints and Ofcom continues to receive the fewest complaints about PAYG mobile services and pay TV compared to the other services included in this report.

⁴² For complaints data published since October 2010 see <http://stakeholders.ofcom.org.uk/market-data-research/other/telecoms-research/complaints/?a=0>

⁴³ Generally, a 4% market share and a regular generation of 30 complaints per month.

⁴⁴ Except for Figure 1 which shows complaint volumes dating further back to: Q4 (October – December) 2010 for broadband, fixed line, and mobile PAYG services; Q2 (April – June) 2011 for pay monthly mobile services; and Q4 (October – December) 2011 for pay TV services.

Figure 1: Relative volume of complaints per sector per 100,000 customers/connections: Q4 2010 – Q2 2016, by quarter

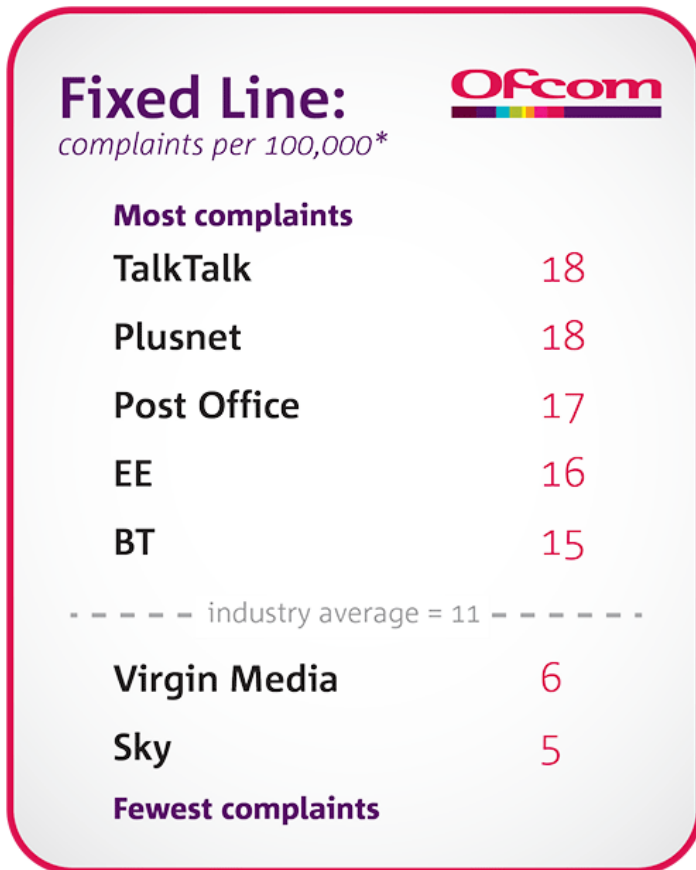

Source: Ofcom, CCT data

Fixed line telephony complaints

- 4.6 The following figures show the residential consumer complaints that Ofcom received against the largest providers of fixed line telephony services in Q2 (April – June) 2016, and between Q3 (July – September) 2014 and Q2 (April – June) 2016 inclusive. The information is presented per 100,000 customers/connections.
- 4.7 Figure 2 and Figure 3 show that TalkTalk and Plusnet generated the highest relative volume of complaints in Q2 2016. Plusnet’s main complaint drivers related to issues around faults, service,⁴⁵ and provision; issues relating to billing, pricing and charges; and complaints handling. TalkTalk’s main complaint drivers were issues with billing, pricing and charges; fault, service and provision; and complaint handling. Post Office HomePhone, EE and BT also generated relative complaint volumes above the industry average. Sky received the least complaints per 100,000 subscribers compared to the other fixed line providers in the report.

⁴⁵ Service in this context relates to issues with the communications service being provided e.g. coverage issues, broadband speeds, restriction of service by provider etc.

Figure 2: Fixed line complaints per 100,000 customers/connections: Q2 2016

**All figures rounded to nearest whole number.
Actual measurable difference may in some cases be less than one.*

*Note: Industry average is limited to those providers included in the report
Source: Ofcom, CCT data*

Figure 3: Fixed line complaints per 100,000 customers/connections: Q3 2014 – Q2 2016

Note: Industry average is limited to those providers included in the report

Source: Ofcom, CCT data

Fixed broadband complaints

- 4.8 The following figures show the residential consumer complaints that Ofcom received against the largest providers of fixed broadband services in Q2 (April – June) 2016, and between Q3 (July – September) 2014 and Q2 (April – June) 2016 inclusive. The information is presented per 100,000 customers/connections.
- 4.9 Figures 4 and 5 show that BT and Plusnet generated the highest relative complaint volumes in Q2 2016. BT's complaint volumes were on their face higher but, due to operators using different methodologies to compile subscriber figures,⁴⁶ we have identified through sensitivity checks that Plusnet's performance may be comparable to BT's. This should be taken in to consideration when comparing provider performance.
- 4.10 BT's main complaint drivers related to faults, service and provision issues; issues with billing, pricing, and charges; and complaint handling. Plusnet's main drivers relate to faults, services and provision; complaints handling; and issues with billing, pricing and charges. EE and TalkTalk also generated above industry average relative complaint levels. Sky generated the lowest relative complaint volumes compared to the other fixed broadband providers that we report on.

⁴⁶ See 1.4 and 3.20

Figure 4: Fixed broadband complaints per 100,000 customers/connections: Q2 2016

* All figures rounded to nearest whole number.
Actual measurable differences may in some cases be less than one.
** NB: Due to different methodologies used to compile subscriber figures, readers should note that Plusnet's performance in Q2 2016 may be comparable to BT's.

Pay monthly mobile complaints

- 4.11 The following figures show the residential consumer complaints that Ofcom received against the largest providers of pay monthly mobile services⁴⁷ in Q2 (April – June) 2016, and between Q3 (July – September) 2014 and Q2 (April – June) 2016 inclusive. The information is presented per 100,000 customers/connections.
- 4.12 Figures 6 and 7 show that Ofcom continued to receive the most complaints per 100,000 subscribers about Vodafone. These mainly related to issues about billing, pricing and charges; complaints handling; and fault, service and provision issues. Talk Mobile complaint levels were in line with the industry average. All other providers reported on generated relative complaint levels that were below the industry average, with Tesco Mobile generating the lowest relative volume of complaints compared to the other published providers.

⁴⁷ These exclude complaints about mobile broadband services (datacards and dongles).

Figure 6: Pay monthly mobile telephony complaints per 100,000 customers/connections: Q2 2016

**All figures rounded to nearest whole number.

Pay TV Complaints

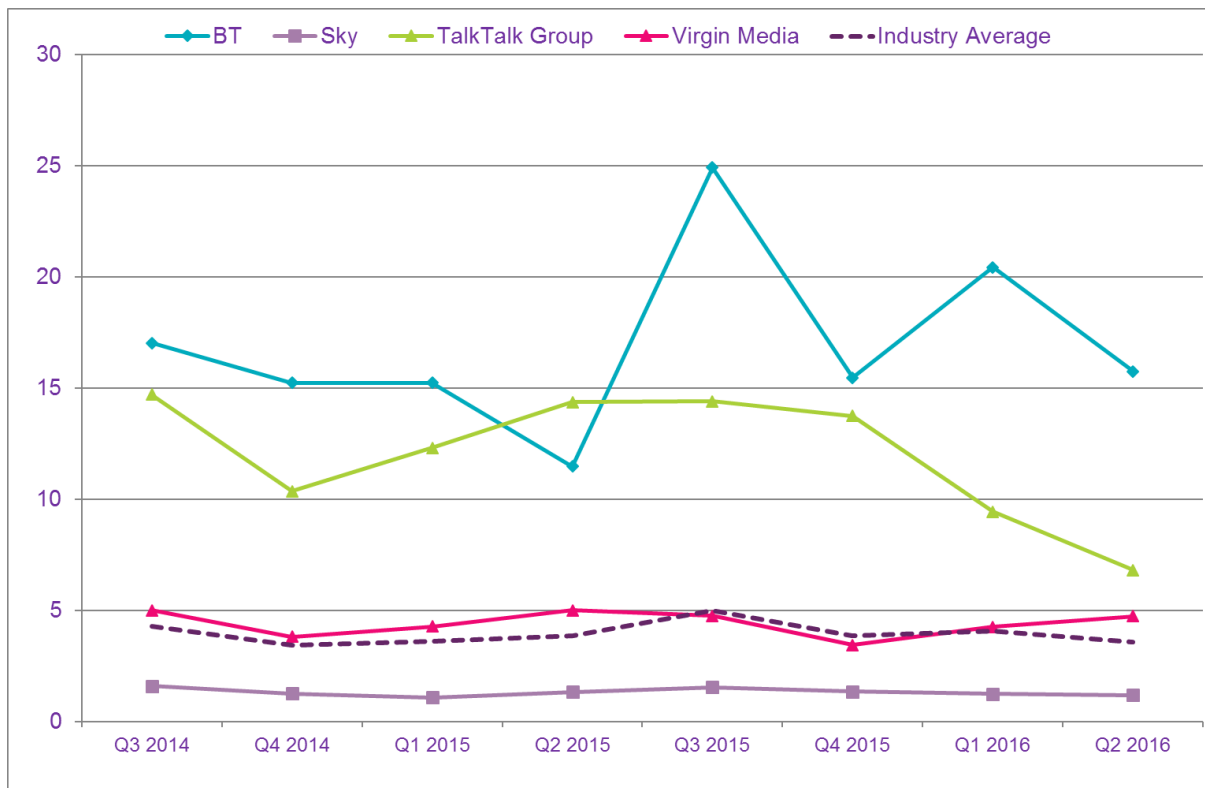

- 4.13 Figures 8 and 9 show the residential consumer complaints that Ofcom received against the largest providers of pay TV services Q2 (April – June) 2016, and between Q3 (July – September) 2014 and Q2 (April – June) 2016 inclusive. The information is presented per 100,000 customers/connections.
- 4.14 The figures below show that BT generated the highest volume of complaints per 100,000 subscribers in Q2 2016. Complaints about BT mainly related to issues around billing, pricing and charges; issues around fault, service, or provision; and complaints handling. TalkTalk and Virgin also generated relative complaint volumes above the industry average, while Sky received the lowest volume of complaints per 100,000 subscribers.

Figure 8: Pay TV complaints per 100,000 customers/connections: Q2 2016
