Question	Your response
Question 1: Should Ofcom exercise its discretion to consent to the application to vary the Winchester small-scale multiplex licensed area, with regard to the statutory and policy considerations set out in this document?	We support Ofcom's view that it should vary the Winchester small scale multiplex licensed area. Small Scale DAB operates on a very different economic model to existing local and national DAB infrastructure, and that model is still evolving as multiplex operators gain experience from operating their licences. Reasonable flexibility helps operators adjust their business models to make their licences sustainable. Whilst a change in the technical plan will cause a change to the achieved coverage, the licensee's incentive will be to maximise coverage efficiency alongside sustainability, subject to remaining broadly within the coverage of the original licensed multiplex area.
Question 2: With reference to our impact assessment, do you agree with our assessment of the potential impacts of approving this application?	We do not have any comments on the specific impacts of this proposed change.
