

Joe Brodie

Question 1: Should Heartland Radio Foundation Limited be permitted to make its proposed changes to the Format of Heartland FM (Perth)?

I think that the Highland Perthshire area which Heartland FM serves has different needs as a community to that of Perth and Dundee especially local news and traffic. The current presenters at Heartland FM have a better knowledge of their local area than I think Dundee based programming could cater for. Therefore, I do not think that the proposed changes take place.

Question 2: Should Wave 102 Limited be permitted to make its proposed changes to the Format of Wave 102?

I feel that this would be against the terms of the original license for broadcasting to the city of Dundee that Wave 102 originally applied for and won. I don't think that Perth, as a city, would benefit on a local level from the changes. Therefore, I don't think the proposed changes should take place.
