Dear Sara Winter

Re: 2009 Ofcom Access Services Review

I help to run a West Somerset Social for visually impaired people in Minehead which is organised by Somerset Sight and agreed to write to you on behalf of our members who have found that audio description has revolutionised their enjoyment of television.

We understand the Ofcom Access Services review includes three options for the future of audio description, and request that Ofcom choose option two and increase audio description to 20% across all channels.

Please take onboard this request for an increase of audio description to 20%.

Yours sincerely

Janet Coram
