

About this data: Fixed performance, 2011 Census Output Area

To create our [Connected Nations 2022 report](#), Ofcom collected and analysed data from fixed broadband providers. This file contains broadband performance data at Census Output Area level. For England and Wales the 2021 Census Output Areas are used, whereas the 2011 Census Output Areas are used for Scotland and Northern Ireland.

The data was collected as a snapshot in May 2022 and includes information based on the number of connections providing an active broadband service, as opposed to individual premises. [Our methodology](#) provides details of our approach to collecting and analysing performance data.

Due to variations in broadband performance over time, the file should not be regarded as a definitive and fixed view of the UK's fixed broadband infrastructure. However, the information provided in this file may be useful in identifying variations in broadband availability.

If you have any questions or feedback on the data, please contact us at open.data@ofcom.org.uk.

We are providing this data on an open basis via the [Open Government Licence](#), which gives users various freedoms about how they choose to use the data, subject to conditions.

The files are provided as a Comma Separated Values file, with double quote (") text delimiters where applicable.

Revision note

[8 Feb 2023] – Corrected an error in the average data usage figures quoted on a 'per line-speed' basis.
