Question 1: Should Heartland Radio Foundation Limited be permitted to make its proposed changes to the Format of Heartland FM (Perth)?

No. In doing so, Perth FM would effectively become a Dundee run station, which is not beneficial to the people of Perth. Perth people need Perth advertising and programming, geared towards them and their local communities. They need to know about Perth-based events and what is going on in their own area. This is not in the public domain, has not been put out to the public for comment or opinions either through press statements or on either website. It is a well-kept secret. A 7 day period is not a long enough consultation period for something which is being withheld from the public.

Question 2: Should Wave 102 Limited be permitted to make its proposed changes to the Format of Wave 102?

No for the same reasons as above.
