Dear [REDACTED] and Ofcom 1.4 GHz Team,

As VMO2 does not have any substantive comments to make on the Ancillary Legislation consultation, or the proposed Regulations, we will not be submitting a standard formal response.

However, I did come across a minor point that I wanted to flag in Annex 7 – The Register Amendment Regulation.

It says...between “1452–1492 MHz” and “2350–2390 MHz”, insert “1492–1517 MHz”.

When I checked the latest version of the Wireless Telegraphy (Register) Regulations 2012 – see here: [The Wireless Telegraphy \(Register\) Regulations 2012](#)

In Schedule 2, Part 2, it shows 1785–1805 MHz listed after 1452–1492 MHz, and before 2350–2390 MHz.

This suggested to me that the amendment should therefore be as follows:

between “1452–1492 MHz” and “1785–1805 MHz”, insert “1492–1517 MHz”.

I wasn’t sure if this was an error, or just a result of Ofcom using the original version of the Regulation to reference the proposed amendment, but I thought I’d flag it to you, just in case.

Best Regards,

[REDACTED]
