Your response

Q. 1 Do you agree with our overall approach to setting the operating licence?	I object to the overall approach based on my response below. I have been unable to find a specific consultation relating to my subject and have assumed that it is an hidden part of this review. I am concerned that the BBC , having written to you in August 2016 and for which I have been unable to find any disclosure on this website, that they wish to encrypt the data channel on public airwave broadcasts, in contravention of the legal requirements not to do so and wish to use a legal device to contravene aforementioned legal requirement. I am therefore posting my objection to any such "device" being used purely as a mechanism to circumvent existing copyright law without public or Parliamentary debate.
Q. 2 Do you agree with the approach we have proposed for public purpose 1, including the high-level objectives and regulatory conditions we are proposing?	I believe there should be far more public disclosure of all licensee communications and that there is an obligation on Ofcom for total transparency, commercial confidentiality on applying to values only and not terms which should all be in the public domain.
