

Your response

Question	Your response
<p>Question 1: Do you anticipate one or more of the NGSO gateways in these applications will pose coexistence challenges to existing services?</p> <p>Please provide evidence of the impact of any likely interference in terms of throughput and unavailability.</p>	<p><i>Is this response confidential? – N</i></p> <p><i>we do Not.</i></p>
<p>Question 2: Do you consider that the measures to enable coexistence with future systems, as set out by the applicant, are reasonable? If not, what are your concerns and to which specific gateway sites do your concerns relate?</p>	<p><i>Is this response confidential? – N</i></p> <p><i>Yes, we believe they are reasonable, The continued improvement of the already good service is completely supported, Poor service and high latency have plagued small business and individuals in rural areas for year, still in 2022 many do not have access to fibre, Starlink bridge the gap and leaves enough room for competition to grow, especially when considering the expansion of the 5G network. We believe the proposal outlined would be beneficial to new and current users and aid the growth of competition when it arrives,</i></p>
<p>Question 3: Could the granting of one or more of these licences prevent your service from operating in the UK or make it less attractive or more costly to enter the market? If yes:</p> <ul style="list-style-type: none"> • Please outline your proposed services, including gateway locations, and indicate when you are planning to start deploying your services. • Please also explain the reasons why granting these licence applications would affect or restrict (i.e. make more costly or less attractive) your future service in the UK. • Please state which of the proposed gateway applications would affect your deployment (if relevant). 	<p><i>Is this response confidential? – N</i></p> <p>No, in fact us would benefit us greatly with faster speeds and lower latency</p>

Question 4: Do you have any additional concerns or comments regarding this application?

Is this response confidential? – N

No
