Self

Organisation (if applicable):

Email:

What additional details do you want to keep confidential?:

Keep name confidential

If you want part of your response kept confidential, which parts?:

Ofcom may publish a response summary:

No

I confirm that I have read the declaration:

Yes

**Question 11: Do you agree that we should oppose a co-primary mobile allocation at WRC-15 for the band 470 ? 694 MHz?:**

Yes, terrestrial TV is still of vast importance to most people particularly as it is only 2 years since the digital switchover in the UK. The current DVB spectrum as possible must be retained for that purpose.

**Question 12: Do you agree that the UK should continue to support harmonisation of 694 - 790 MHz for mobile broadband and an out-of-band emission limit for protection of DTT reception in an ITU R Recommendation, alongside an acknowledgement that 694 MHz should be the lower frequency boundary for the band?:**

As per my previous response the entire DVB spectrum must be maintained. There is currently no viable replacement for Freeview type services so they must be maintained.
