

Question 1: Do you think we should merge the Luton and Bedford areas and advertise a single licence, or advertise these as separate licences? Why? :

Question 2: Do you think we should merge the Gloucester and Malvern areas and advertise a single licence, or advertise these as separate licence? Why? :

Additional comments:

Having worked these areas for may years until I retired I can say Gloucestershire does not link with Malvern in any way. There is very little flow of people between these two ares with no natural links. Malvern tends to link its self with Worcester in all aspects of life,. Many people commute between these two towns as well as go shopping in either as well as for entertainment etc.

From a technical point of view the Malvern transmitter covers the City of Worcester quite well and just north of Worcester to J6 of the M5 motorway where as the proposed Local tv service from Birmingham does NOT reach down to the City of Worcester. These would overlay the local Radio in the two counties ie one for Gloucestershire and the other for Hereford & Worcester.

Regards

Eric Smith.
