Dear Ofcom,

I am writing to you in regard to the consultation on combined auction (800 MHz & 2.6 GHz spectrum bands) which will make 4G spectrum available in the UK. I believe that there should be adequate all Wales and all UK coverage. I am concerned that if Wales is not included in this that Wales would be left behind. There should be a requirement that licence holders will cover at least 98% of the population of Wales as well as 98% of the populations of other nations within the UK.

I would be grateful if you could take this into account when considering consultation responses received.

Yours sincerely

Vaughan Gething AM
