Additional comments:

After reading the breif notes found on thinkbraodband.com in regards to this bill I would like to say that I do not agree with this new defination. The reason for this is that as far as I can tell this bill would open up more compitition on market 2 and three areas.

while keeping myself and everyone else I know locked into a market one area with only one operator providing the serives that I can access.

this means that I have to pay a higher price for my service. I dont mind paying more for services but I do expect the higher price to have a certin level of quality.

this is not happening at the moment peaple in market one areas are being charged higher prices so that their suppliers can offer discounts in areas where there is more compitition.

Question 1: Do you agree with our revised geographic market definition? If not, please explain why?:

I do not agree as this would bring prices in market 2 and 3 areas down further but would at the same time puch prices in market one areas up.

Question 2: In light of the revised geographic market definition presented in this consultation, do your previous comments on SMP remain appropriate? If not, please explain why?:

Question 3: Do you have any further comments to add in relation to the SMP assessment?:

Question 4: In light of the revised geographic market definition and SMP analysis presented in this consultation, do your previous comments on remedies remain appropriate? If not, please explain why?:

Question 5: Do you have any further comments to add in relation to remedies in Market 1 and Market 2?:

I would like to see a proposal that would completly remove market one areas so that the whole country could benifit from cheaper higher quality broadband speeds.

currently I line in Lochgelly in fife scotland. At the time of writing this there are no plans to upgrade my local exchange to give a better internet service

Question 6: Do you have any further comments to add in relation to the period of notice that should apply to exchanges that move from Market 2 to Market 3?:
