

Im all for letting people use the radio spectrum, even unlicensed users having their own frequencies but not with mixing users of bands or even letting unlicensed users use bands where people work hard to get a licence to use the spectrum

Question 1: Do you agree with our proposal to permit railway level crossing radar sensor systems to operate in the UK, on a licence exempt basis, providing that exclusion zones are put in place to protect Radio Astronomy sites?::

As long as its not between 430mhz-440mhz or any amateur band or any licensed users

Question 2: Do you agree with our proposal to exempt users of HDFSS equipment operating with e.i.r.p. no greater than 55 dBW in the 27.50 to 27.8185 GHz, 28.4585 to 28.8265 GHz and 29.4625 to 30 GHz bands from the need to possess a wireless telegraphy licence?:

as long as it doesnt interfere with licensed users

Question 3: Do you agree with our proposal to permit underwater SRD systems to operate in the UK, providing in-air emissions meet the present limitations for licence-exempt use?::

As long as its not between 430mhz-440mhz or any amateur band or any licensed users

Question 4: Do you agree with our proposal to remove restrictions where a more liberal duplication of the regulations exists elsewhere in the UK licence exemption regulations and incorporate all relevant information for licence exempt SRD into a single Interface requirement document?::

As long as its not between 430mhz-440mhz or any amateur band or any licensed users
