

Title:

Ms

Forename:

DeNica

Surname:

Fairman

Representing:

Self

What do you want Ofcom to keep confidential?

Keep nothing confidential

Additional comments:

How many more adults & children have to develop cancers & die before these masts are set at safe levels? (if they exist)

Why are the transmission levels in the UK so much higher than in countries such as Sweden & Denmark who have recently lowered theirs even more to ensure the population is not exposed to any more radiation than is necessary to enable mobile phone usage?

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

Yes, there is The Stewart Report which states that until we are 100% sure that base stations and non-thermal microwaves are not harmful we should exercise the Precautionary Principle.

This proposal is not doing that.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Yes, The Stewart Report which states that until we are 100% sure that base stations and non-thermal microwaves are not harmful we should exercise the Precautionary Principle.

This proposal is not doing that.
