

**Title:**

Mr

**Forename:**

Micheal

**Surname:**

Bishop

**Representing:**

Self

**What do you want Ofcom to keep confidential?**

Keep nothing confidential

**Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:**

I don't understand why some countries are thinking it is necessary to cut exposure to these microwaves, that here it is being considered to quadruple them. My sleep patterns and my concentration ability have improved since I have been wearing an anti-electro smog net, which is very inconvenient but seems to do the trick. Further power boosts should not be allowed until there is some funding in place at the very least to shield paint the homes of persons who are electro- hypersensitive. If this is not so, you will be forcing myself and many others to live a life of misery if OFCOM lets this go ahead. Please study it further first and take notice of the wisdom of the countries that are aware of the problems this technology brings with it.

This information should have been more publicly available as I have only found out on the morning of the cut off date which has forced from me a hastily written objection and no time to insert facts/figures.

**Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:**

I don't understand why some countries are thinking it is necessary to cut exposure to these microwaves, that here it is being considered to quadruple them. My sleep patterns and my concentration ability have improved since I have been wearing an anti-electro smog net, which is very inconvenient but seems to do the trick. Further power boosts should not be allowed until there is some funding in place at the very least to shield paint the homes of persons who are electro hypersensitive. If this is not so, you will be forcing myself and many others to live a life of misery if this goes ahead. Please study it further first and take notice of the wisdom of the countries that are aware of the problems this technology brings with it. This information should have been more publicly available as I have only found out on the morning of the cut off date which has forced from me a hastily written objection and no time to insert facts/figures.
