What do you want Ofcom to keep confidential?

Keep nothing confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

Yes. Not enough research has been carried out on health implications. Not enough consultation has taken place, and not enough people are aware of the increase and the implications it could have in future. Other countries have carried out research and have a lower maximum level than our current level.

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

Yes. As above. This has not been fully researched and the public has not been informed of the possible harmful effects of such increases. Wireless technology is still relatively new and it is developing at an alarming pace without the opportunity to review health concerns.
