What do you want Ofcom to keep confidential?

Keep name confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

No one has looked into the health implications for the general population and the impact this would have on the wildlife. I think it would be prudent to delay this licence until such evidence can be gathered to assure public safety, assuming of course this is of concern to anyone anymore

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

No one has looked into the health implications for the general population and the impact this would have on the wildlife. I think it would be prudent to delay this licence until such evidence can be gathered to assure public safety, assuming of course this is of concern to anyone anymore
