What do you want Ofcom to keep confidential?

Keep name confidential

Question 1: Are there any reasonable grounds why Ofcom should not grant the request to vary the five Wireless Telegraphy Third Generation Mobile Licences by increasing the permitted maximum in-band EIRP to 68dBm as soon as practicable? If so, please explain your reasoning for this:

yes--on health grounds as in many countries it is not considered safe to have existing masts near homes or schools, so obviously it follows how much more radiation will emanate from the new breed, being proposed

Question 2: Are there any reasonable grounds why Ofcom should not also apply the increased permitted maximum in-band EIRP to future 2 GHz MSS/CGC licences? If so, please explain your reasoning for this:

yes--on health grounds as in many countries it is not considered safe to have existing masts near homes or schools, so obviously it follows how much more radiation will emanate from the new breed, being proposed.

we ran a successful campaign based on information from mast safety, which I accept having read the opposition science. Otherwise why have schools not installed wireless.
