

What do you want Ofcom to keep confidential?:

Keep name confidential

If you want part of your response kept confidential, which parts?:

Ofcom may publish a response summary:

Yes

I confirm that I have read the declaration:

Yes

Ofcom should only publish this response after the consultation has ended:

You may publish my response on receipt

Additional comments:

Question 1: Do you agree that copy management would broaden the range of HD content available on DTT and help secure its long term viability as a platform? :

No. The exact opposite. It would lead to the medium being sidetracked and rendered worthless in a read/write culture.

Question 2: Do you agree that the BBC's proposed multiplex licence amendment represents the most appropriate means for securing an effective content management system on HD DTT? :

Question 3: Do you agree with the proposed change to Condition 6 in the Multiplex B Licence? :

Question 4: Do you agree that Multiplexes C and D should be granted a similar amendment to their Licences as Multiplex B?. :

Question 5: Do you agree that the BBC's proposed approach for implementing content management would safeguard citizens and consumers legitimate use of HD content, and if not, what additional guarantees would be appropriate? :

No. It would only remove fair use and other rights from the public. A free open, DRM free delivery is needed. As is has been used with analogue content. This is to preserve the need and requirement that the BBC support an open platform of recievers. Like MythTV.

Question 6: Do you agree that the BBC's proposed choice of content management technologies will have only a negligible impact on the cost of HD DTT receivers and their interoperability with other HD consumer equipment?

. :

No. I do not think so. More so it will prohibit the ability of free third party software like Myth TV.

Question 7: Do stakeholders agree that the BBC's proposed Huffman Code licensing arrangements would have a negligible effect on the market for HD DTT receivers? :

Question 8: Do the BBC's proposed content management states and their permitted use for different categories of HD content meet the requirements of other HD broadcasters on DTT? . :

Question 9: Are there any issues that you consider Ofcom should take into account in assessing the BBC's proposal, that have not been addressed by this consultation?:

DRM of any sort prohibits fair use that is essential for our society. As a teacher my ability to remix, quote and sample television as an educational tool will be prevented. This limits not only the use of TV today, but prevents further developments of the technology.
